THE FUND

The Marathon Value Portfolio is a diversified series of shares of Northern Lights Fund Trust III, a Delaware statutory trust organized on December 5, 2011 (the "Trust"). Pursuant to a reorganization that took place on March 8, 2013, the Fund is the successor to the Marathon Value Portfolio, a series of the Unified Series Trust (the "Predecessor Fund"), which in turn is the successor to the Marathon Value Portfolio of the AmeriPrime Funds (the "Original Fund"), pursuant to a reorganization that took place on January 3, 2003. The Predecessor Fund and the Original Fund had the same investment objectives and strategies and substantially the same investment policies as the Fund. The Original Fund commenced operations in March 1998.

The Trust is registered as an open-end management investment company. The Trust is governed by its Board of Trustees (the "Board," "Trustees" or "Board of Trustees"). The Fund may issue an unlimited number of shares of beneficial interest. All shares of the Fund have equal rights and privileges. Each share of the Fund is entitled to one vote on all matters as to which shares are entitled to vote. In addition, each share of the Fund is entitled to participate equally with other shares (i) in dividends and distributions declared by the Fund and (ii) on liquidation to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares of the Fund are fully paid, non-assessable and fully transferable, and have no pre-emptive, conversion or exchange rights. Fractional shares have proportionately the same rights, including voting rights, as are provided for a full share.

Gratus Capital, LLC ("Gratus" or the "Adviser") is the Fund's investment adviser. The Fund's investment objectives, restrictions and policies are more fully described here and in the Prospectus. The Board may start other series and offer shares of a new fund under the Trust at any time.

The Fund offers a single class of shares. The Board of Trustees may classify and reclassify the shares of the Fund into additional classes of shares at a future date.

Under the Trust's Agreement and Declaration of Trust, each Trustee will continue in office until the termination of the Trust or his/her earlier death, incapacity, resignation or removal. Shareholders can remove a Trustee to the extent provided by the Investment Company Act of 1940, as amended (the "1940 Act") and the rules and regulations promulgated thereunder. Vacancies may be filled by a majority of the remaining Trustees, except insofar as the 1940 Act may require the election by shareholders. As a result, normally no annual or regular meetings of shareholders will be held unless matters arise requiring a vote of shareholders under the Agreement and Declaration of Trust or the 1940 Act.

INVESTMENTS AND RISKS

The investment objective of the Fund and the descriptions of the Fund's principal investment strategies are set forth under "Investment Objective, Principal Investment Strategies, Related Risks" in the Prospectus. The Fund's investment objective is not fundamental and may be changed without the approval of a majority of the outstanding voting securities of the Trust.

The following pages contain more detailed information about the types of instruments in which the Fund may invest, strategies the Adviser may employ in pursuit of the Fund's investment objective and a summary of related risks.

Common Stock and Equivalents

The Fund may invest in common stock and common stock equivalents (such as rights and warrants, and convertible securities), and preferred stock. Warrants are options to purchase equity securities at a specified price valid for a specific time period. Rights are similar to warrants, but normally have a short duration and are distributed by the issuer to its shareholders. The Fund may invest up to 5% of its net assets at the time of purchase in each of the following: rights, warrants or convertible securities.

Exchange-Traded Funds

Exchange-traded funds (“ETFs”) in which the Fund may invest include S&P Depository Receipts (“SPDRs”), inverse index ETFs, Sector ETFs and other exchange-traded products. To the extent the Fund invests in a sector product, the Fund is subject to the risks associated with that sector. Additionally, the Fund may invest in new exchange-traded shares as they become available. When the Fund invests in ETFs or other investment companies, it will indirectly bear its proportionate share of any fees and expenses payable directly by the Investment Company. In connection with its investments in other investment companies, the Fund will incur higher expenses, many of which may be duplicative. For example, shareholders may incur expenses associated with capital gains distributions by the Fund as well as the underlying funds in which the Fund invests. Shareholders may also incur increased transaction costs as a result of the Fund’s portfolio turnover rate and/or because of high portfolio turnover rates in underlying funds in which the Fund may invest. The Fund is not required to hold securities for any minimum period and, as a result, may incur short-term redemption fees and increased trading costs. When selecting underlying funds for investment, the Fund will not be precluded from investing in an underlying fund with a higher than average expense ratio. The Fund is independent from any of the underlying funds in which it invests and it has no voice in or control over the investment strategies, policies or decisions of the underlying funds. The Fund’s only option is to liquidate its investment in an underlying fund in the event of dissatisfaction with the fund. For purposes of determining the amount of Fund assets invested in equity and/or fixed income securities, the Fund will consider ETFs that invest primarily in equity securities to be equity securities, and those that invest primarily in fixed income securities will be deemed fixed income securities.

To the extent that the Fund invests in ETFs that invest in commodities, it will be subject to additional risks. Commodities are real assets such as oil, agriculture, livestock, industrial metals, and precious metals such as gold or silver. The values of ETFs that invest in commodities are highly dependent on the prices of the related commodity. The demand and supply of these commodities may fluctuate widely based on such factors as interest rates, investors’ expectation with respect to the rate of inflation, currency exchange rates, the production and cost levels of the producing countries and/or forward selling by such producers, global or regional political, economic or financial events, purchases and sales by central banks, and trading activities by hedge funds and other commodity funds. Commodity ETFs may use derivatives, such as futures, options and swaps, which exposes them to further risks, including counterparty risk (i.e., the risk that the institution on the other side of their trade will default).

The Fund may invest in leveraged and/or inverse ETFs, including multiple inverse (or ultra-short) ETFs. These ETFs are subject to additional risk not generally associated with traditional ETFs. Leveraged ETFs seek to multiply the performance of the particular benchmark that is tracked (which may be an index, a currency or other benchmark). Inverse ETFs seek to negatively correlate to the performance of its benchmark. These ETFs seek to achieve their returns by using various forms of

derivative transactions, including by short-selling the underlying index. Ultra-short ETFs seek to multiply the negative return of the tracked index (e.g., twice the inverse return). As a result, an investment in an inverse ETFs will decrease in value when the value of the underlying index rises. For example, an inverse ETF tracking the S&P 500 Index will gain 1% when the S&P falls 1% (if it is an ultra-short ETF that seeks twice the inverse return, it will gain 2%), and will lose 1% if the S&P 500 gains 1% (if an ultra-short ETF that seeks twice the inverse return, it would lose 2%). By investing in ultra-short ETFs and gaining magnified short exposure to a particular index, the Fund can commit less assets to the investment in the securities represented on the index than would otherwise be required.

Leveraged and inverse ETFs typically determine their inverse return on a day-to-day basis and, as a result, there is no guarantee that the ETF's actual long term returns will be equal to the daily return that the fund seeks to achieve. For example, on a long-term basis (e.g., a period of 6 months or a year), the return of a double inverse ETF may in fact be considerably less than two times the long-term inverse return of the tracked index. Furthermore, because these ETFs achieve their results by using derivative instruments, they are subject to the risks associated with derivative transactions, including the risk that the value of their derivatives may rise or fall more rapidly than other investments, thereby causing the ETF to lose money and, consequently, the value of the Fund's investment to lose value. Derivative instruments also involve the risk that other parties to the derivative contract may fail to meet their obligations, which could cause losses to the ETF. Short sales in particular are subject to the risk that, if the price of the security sold short increases, the ETF may have to cover its short position at a higher price than the short sale price, resulting in a loss to the leveraged or inverse ETF and, indirectly, to the Fund. The use of these techniques by the leveraged or inverse ETF will make the Fund's investment in such ETF more volatile than if the Fund will to invest directly in the securities underlying the tracked index, or in an ETF that does not use leverage or derivative instruments. However, by investing in an inverse ETF rather than directly purchasing and/or selling derivative instruments, the Fund will limit its potential loss solely to the amount actually invested in the ETF (that is, the Fund will not lose more than its principal amount). Inverse ETFs may also incur capital gains, some of which may be taxed as ordinary income, thereby, increasing the amounts of the Fund's taxable distributions.

Preferred Stock

Preferred stock has a preference in liquidation (and, generally dividends) over common stock but is subordinated in liquidation to debt. As a general rule the market value of preferred stocks with fixed dividend rates and no conversion rights varies inversely with interest rates and perceived credit risk, with the price determined by the dividend rate. Some preferred stocks are convertible into other securities, (for example, common stock) at a fixed price and ratio or upon the occurrence of certain events. The market price of convertible preferred stocks generally reflects an element of conversion value. Because many preferred stocks lack a fixed maturity date, these securities generally fluctuate substantially in value when interest rates change; such fluctuations often exceed those of long term bonds of the same issuer. Some preferred stocks pay an adjustable dividend that may be based on an index, formula, auction procedure or other dividend rate reset mechanism. In the absence of credit deterioration, adjustable rate preferred stocks tend to have more stable market values than fixed rate preferred stocks. All preferred stocks are also subject to the same types of credit risks of the issuer as corporate bonds. In addition, because preferred stock is junior to debt securities and other obligations of an issuer, deterioration in the credit rating of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar yield characteristics. Preferred stocks may be rated by Standard & Poor's Corporation ("S&P") and Moody's Investors Services, Inc. ("Moody's") although there is no minimum rating which a preferred stock must have (and a preferred stock may not be rated) to be an eligible investment for the Fund. The Adviser expects, however, that

generally the preferred stocks in which the Fund invests will be rated at least BBB by S&P or Baa by Moody's or, if unrated, of comparable quality in the opinion of the Adviser. Moody's rating with respect to preferred stocks does not purport to indicate the future status of payments of dividends.

Debt Securities

The Fund may invest in short- and long-term debt securities, including convertible debt securities. Changes in interest rates will affect the value of the Fund's investments in debt securities. Increases in interest rates may cause the value of the Fund's investments to decline and this decrease in value may not be offset by higher interest income from new investments. Changes in the financial strength of an issuer or changes in the ratings of any particular security may also affect the value of fixed income securities.

Foreign Securities

The Fund may invest up to 25% of its assets in foreign equity and debt securities, measured at the time of purchase. The Fund may invest in foreign securities directly or indirectly through American Depositary Receipts ("ADRs"). Foreign investments can involve significant risks in addition to the risks inherent in U.S. investments. The value of securities denominated in or indexed to foreign currencies, and of dividends and interest from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets, and prices on some foreign markets can be highly volatile. Many foreign countries lack uniform accounting and disclosure standards comparable to those applicable to U.S. companies, and it may be more difficult to obtain reliable information regarding an issuer's financial condition and operations. In addition, the costs of foreign investing, including withholding taxes, brokerage commissions, and custodial costs, generally are higher than for U.S. investments. Investing abroad also involves different political and economic risks. Foreign investments may be affected by actions of foreign governments adverse to the interests of U.S. investors, including the possibility of expropriation or nationalization of assets, confiscatory taxation, restrictions on U.S. investment or on the ability to repatriate assets or convert currency into U.S. dollars, or other government intervention.

In the case of securities of foreign issuers, the interest and dividends paid by foreign issuers may be subject to withholding and other foreign taxes, which may decrease the net return on such investments as compared to dividends and interest paid to the Fund by domestic issuers, or by the U.S. government.

Foreign debt securities in which the Fund may invest will include bonds and other debt instruments issued by foreign government (i.e., sovereign debt). Sovereign debt differs from debt obligations issued by private entities in that, generally, remedies for defaults must be pursued in the courts of the defaulting party. Legal recourse is therefore limited. Political conditions, especially a sovereign entity's willingness to meet the terms of its debt obligations, are of considerable significance. A sovereign debtor's willingness or ability to repay principal and pay interest in a timely manner may be affected by a variety of factors, including among others, its cash flow situation, the extent of its foreign reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the sovereign debtor's policy toward principal international lenders and the political constraints to which a sovereign debtor may be subject. A country whose exports are concentrated in a few commodities could be vulnerable to a decline in the international price of such commodities. Another factor bearing on the ability of a country to repay

sovereign debt is the level of the country's international reserves. Fluctuations in the level of these reserves can affect the amount of foreign exchange readily available for external debt payments and, thus, could have a bearing on the capacity of the country to make payments on its sovereign debt. Also, there can be no assurance that the holders of commercial bank loans to the same sovereign entity may not contest payments to the holders of sovereign debt in the event of default under commercial bank loan agreements.

Foreign markets may also offer less protection to investors than U.S. markets. Foreign issuers, brokers, and securities markets may be subject to less government supervision. Foreign security trading practices, including those involving the release of assets in advance of payment, may invoke increased risks in the event of a failed trade or the insolvency of a broker-dealer, and may involve substantial delays. It also may be difficult to enforce legal rights in foreign countries.

The considerations noted above generally are intensified for investments in developing countries. Developing countries may have relatively unstable governments, economies based on only a few industries and securities markets that trade a small number of securities.

American Depositary Receipts ("ADRs") and European Depositary Receipts ("EDRs") are certificates evidencing ownership of shares of a foreign-based issuer held in trust by a bank or similar financial institution. Designed for use in U.S. and European securities markets, respectively, ADRs and EDRs are alternatives to the purchase of the underlying securities in their national market and currencies. Generally, ADRs, in registered form, are denominated in U.S. dollars and are designed for use in the U.S. securities markets, while EDRs are denominated in European currencies, and are designed to trade on the European markets. ADRs do not eliminate all risk inherent in investing in the securities of foreign issuers. However, by investing in ADRs rather than directly in equity securities of foreign issuers, the Fund will avoid currency risks during the settlement period for either purchases or sales. For purposes of the Fund's investment policies, ADRs and EDRs are deemed to have the same classification as the underlying securities they represent, except that ADRs and EDRs shall be treated as indirect foreign investments. For example, an ADR or EDR representing ownership of common stock will be treated as common stock.

REITs

The Fund may invest up to 15% of its assets in real estate investment trusts ("REITs"). A REIT is a corporation or business trust that invests substantially all of its assets in interests in real estate. Equity REITs are those which purchase or lease land and buildings and generate income primarily from rental income. Equity REITs may also realize capital gains (or losses) when selling property that has appreciated (or depreciated) in value. Mortgage REITs are those which invest in real estate mortgages and generate income primarily from interest payments on mortgage loans. Hybrid REITs generally invest in both real property and mortgages. The Fund generally considers equity REITs to be equity securities, while mortgage REITs and hybrid REITs generally are considered fixed income securities. REITs are generally subject to risks associated with direct ownership of real estate, such as decreases in real estate values or fluctuations in rental income caused by a variety of factors, including increases in interest rates, increases in property taxes and other operating costs, casualty or condemnation losses, possible environmental liabilities and changes in supply and demand for properties. Risks associated with REIT investments include the fact that equity and mortgage REITs are dependent upon specialized management skills and are not fully diversified. These characteristics subject REITs to the risks associated with financing a limited number of projects. They are also subject to heavy cash flow dependency, defaults by borrowers and self-liquidation. Additionally, equity REITs may be affected by

any changes in the value of the underlying property owned by the trusts, and mortgage REITs may be affected by the quality of any credit extended.

Indexed Securities

The Fund may invest up to 5% of its net assets in purchases of securities whose prices are indexed to the prices of other securities, securities indices, or other financial indicators. Indexed securities typically, but not always, are debt securities or deposits whose value at maturity or coupon rate is determined by reference to a specific instrument or statistic.

The performance of indexed securities depends to a great extent on the performance of the security, or other instrument to which they are indexed, and also may be influenced by interest rate changes in the U.S. and abroad. At the same time, indexed securities are subject to the credit risks associated with the issuer of the security, and their values may decline substantially if the issuer's creditworthiness deteriorates. Changes in the reference instrument may cause the interest rate on an indexed security to be reduced to zero, at which point further adverse changes may lead to a reduction in the principal amount payable on maturity. Indexed securities may also be less liquid than other types of securities, and may be more volatile than the reference factor. Consistent with the Fund's policy on illiquid investments, the Fund will only invest in indexed securities to the extent the Adviser determines that such products are liquid.

Convertible Securities

A convertible security may be a bond, debenture, preferred stock or other security that may be converted into or exchanged for a prescribed amount of common stock. The Fund may invest up to 5% of its assets in convertible securities.

Junk Bonds

The Fund may invest up to 5% of its total assets in junk bonds rated at the time of purchase BB/Ba or lower by S&P or Moody's or, unrated, but determined to be of comparable quality by the Adviser. Junk bonds are subject to greater market risk and credit risk, or loss of principal and interest, than higher-rated securities. The capacity of issuers of lower-rated securities to pay interest and repay principal is more likely to weaken than is that of issuers of higher-rated securities in times of deteriorating economic conditions or rising interest rates. In addition, lower-rated securities may be more susceptible to real or perceived adverse economic conditions than investment grade securities.

The market for lower-rated securities may be thinner and less active than that for higher-rated securities, which can adversely affect the prices at which these securities can be sold. To the extent that there is no established secondary market for lower-rated securities, the Fund may experience difficulty in valuing the securities for the purpose of computing its net asset value ("NAV"). Adverse publicity and investors' perception about lower-rated securities, whether or not factual, may tend to impair their market value and liquidity.

Generally, investments in securities in the lower rating categories provide higher yields but involve greater volatility of price and risk of loss of principal and interest than investments in securities with higher ratings. Securities rated lower than Baa by Moody's or BBB by S&P are considered speculative. In addition, lower ratings reflect a greater possibility of an adverse change in the financial conditions affecting the ability of the issuer to make payments of principal and interest. The market

price of lower-rated securities generally responds to short term corporate and market developments to a greater extent than higher-rated securities which react primarily to fluctuations in the general level of interest rates. Lower-rated securities will also be affected by the market's perception of their credit quality and the outlook for economic growth.

In the past, economic downturns or rising interest rates have under certain circumstances caused a higher incidence of default by the issuers of these securities and may do so in the future, especially in the case of highly leveraged issuers. The prices for these securities may be affected by legislative and regulatory developments. The market for lower-rated securities may be less liquid than the market for higher-rated securities. Furthermore, the liquidity of lower-rated securities may be affected by the market's perception of their credit quality. Therefore, judgment may at times play a greater role in valuing these securities than in the case of higher-rated securities, and it also may be more difficult during certain adverse market conditions to sell lower-rated securities at their fair value to meet redemption requests or to respond to changes in the market.

The Adviser will consider all factors which it deems appropriate, including ratings, in making investment decisions for the Fund and will attempt to minimize investment risk through conditions and trends. While the Adviser may refer to ratings, it does not rely exclusively on ratings, but makes its own independent and ongoing review of credit quality.

Repurchase Agreements

A repurchase agreement is a short-term investment in which the purchaser (i.e., the Fund) acquires ownership of an obligation issued by the U.S. government or by an agency of the U.S. government ("U.S. Government Obligations") (which may be of any maturity) and the seller agrees to repurchase the obligation at a future time at a set price, thereby determining the yield during the purchaser's holding period (usually not more than seven days from the date of purchase). Any repurchase transaction in which the Fund engages will require full collateralization of the seller's obligation during the entire term of the repurchase agreement. In the event of a bankruptcy or other default of the seller, the Fund could experience both delays in liquidating the underlying security and losses in value. However, the Fund intends to enter into repurchase agreements only with the Fund's custodian, other banks with assets of \$1 billion or more and registered securities dealers determined by the Adviser to be creditworthy. The Adviser monitors the creditworthiness of the banks and securities dealers with which the Fund engages in repurchase transactions, and the Fund will not invest more than 5% of its net assets in repurchase agreements.

Loans of Portfolio Securities

The Fund may make short- and long-term loans of its portfolio securities. Under the lending policy authorized by the Board of Trustees and implemented by the Adviser in response to requests of broker-dealers or institutional investors which the Adviser deems qualified, the borrower must agree to maintain collateral, in the form of cash or U.S. Government Obligations, with the Fund on a daily mark-to-market basis in an amount at least equal to 100% of the value of the loaned securities. The Fund will continue to receive dividends or interest on the loaned securities and may terminate such loans at any time or reacquire such securities in time to vote on any matter which the Board of Trustees determines to be important. With respect to loans of securities, there is the risk that the borrower may fail to return the loaned securities or that the borrower may not be able to provide additional collateral.

Short Sales

Short Sales “Against The Box.” The Fund may engage in short sales against the box. In a short sale, the Fund sells a borrowed security and has a corresponding obligation to the lender to return the identical security. The seller does not immediately deliver the securities sold and is said to have a short position in those securities until delivery occurs. The Fund may engage in a short sale if at the time of the short sale the Fund owns or has the right to obtain without additional cost an equal amount of the security being sold short. This investment technique is known as a short sale “against the box.” It may be entered into by the Fund to, for example, lock in a sale price for a security the Fund does not wish to sell immediately. If the Fund engages in a short sale, the collateral for the short position will be segregated in an account with the Fund’s custodian or qualified sub-custodian. No more than 10% of the Fund’s net assets (taken at current value) may be held as collateral for short sales against the box at any one time.

The Fund may make a short sale as a hedge, when it believes that the price of a security may decline, causing a decline in the value of a security owned by the Fund (or a security convertible or exchangeable for such security). In such case, any future losses in the Fund’s long position should be offset by a gain in the short position and, conversely, any gain in the long position should be reduced by a loss in the short position. The extent to which such gains or losses are reduced will depend upon the amount of the security sold short relative to the amount the Fund owns. There will be certain additional transaction costs associated with short sales against the box, but the Fund will endeavor to offset these costs with the income from the investment of the cash proceeds of short sales.

If the Fund effects a short sale of securities at a time when it has an unrealized gain on the securities, it may be required to recognize that gain as if it had actually sold the securities (as a “constructive sale”) on the date it effects the short sale. However, such constructive sale treatment may not apply if the Fund closes out the short sale with securities other than the appreciated securities held at the time of the short sale and if certain other conditions are satisfied. Uncertainty regarding the tax consequences of effecting short sales may limit the extent to which the Fund may effect short sales.

Short Sales (excluding Short Sales “Against the Box”). The Fund may sell securities short. A short sale is a transaction in which the Fund sells securities it does not own in anticipation of a decline in the market price of the securities.

To deliver the securities to the buyer, the Fund must arrange through a broker to borrow the securities and, in so doing, the Fund becomes obligated to replace the securities borrowed at their market price at the time of replacement, whatever that price may be. The Fund will make a profit or incur a loss as a result of a short sale depending on whether the price of the securities decreases or increases between the date of the short sale and the date on which the Fund purchases the security to replace the borrowed securities that have been sold. The amount of any loss would be increased (and any gain decreased) by any premium or interest the Fund is required to pay in connection with a short sale.

The Fund’s obligation to replace the securities borrowed in connection with a short sale will be secured by cash or liquid securities deposited as collateral with the broker. In addition, the Fund will place in a segregated account with its custodian or a qualified sub-custodian an amount of cash or liquid securities equal to the difference, if any, between (i) the market value of the securities sold at the time they were sold short and (ii) any cash or liquid securities deposited as collateral with the broker in connection with the short sale (not including the proceeds of the short sale). Until it replaces the

borrowed securities, the Fund will maintain the segregated account daily at a level so that (a) the amount deposited in the account plus the amount deposited with the broker (not including the proceeds from the short sale) will equal the current market value of the securities sold short and (b) the amount deposited in the account plus the amount deposited with the broker (not including the proceeds from the short sale) will not be less than the market value of the securities at the time they were sold short.

Collateralized Mortgage Obligations (“CMOs”)

CMOs are securities that are collateralized by mortgages or mortgage-backed securities. CMOs are issued with a variety of classes or series, which have different maturities and are often retired in sequence. CMOs may be issued by governmental or non-governmental entities such as banks and other mortgage lenders. Non-government securities may offer a higher yield but also may be subject to greater price fluctuation than government securities. Investments in CMOs are subject to the same risks as direct investments in the underlying mortgage and mortgage-backed securities. In addition, in the event of a bankruptcy or other default of an entity who issued the CMO held by the Fund, the Fund could experience both delays in liquidating its position and losses.

Options

An option is a contract in which the “holder” (the buyer) pays a certain amount (“premium”) to the “writer” (the seller) to obtain the right, but not the obligation, to buy from the writer (in a “call”) or sell to the writer (in a “put”) a specific asset at an agreed upon price (“strike price” or “exercise price”) at or before a certain time (“expiration date”). The holder pays the premium at inception and has no further financial obligation. The holder of an option will benefit from favorable movements in the price of the underlying asset but is not exposed to corresponding losses due to adverse movements in the value of the underlying asset. The writer of an option will receive fees or premiums but is exposed to losses due to adverse changes in the value of the underlying asset. The Fund may buy (hold) or write (sell) put and call options on assets, such as securities, currencies, financial commodities, and indexes of debt and equity securities (“underlying assets”) and enter into closing transactions with respect to such options to terminate an existing position.

Writing put or call options can enable the Fund to enhance income by reason of the premiums paid by the purchaser of such options. Writing call options serves as a limited short hedge because declines in the value of the hedged investment would be offset to the extent of the premium received for writing the option. However, if the security appreciates to a price higher than the exercise price of the call option, it can be expected that the option will be exercised and the Fund will be obligated to sell the security at less than its market value or will be obligated to purchase the security at a price greater than that at which the security must be sold under the option. Writing put options serves as a limited long hedge because decreases in the value of the hedged investment would be offset to the extent of the premium received for writing the option. However, if the security depreciates to a price lower than the exercise price of the put option, it can be expected that the put option will be exercised and the Fund will be obligated to purchase the security at more than its market value.

The value of an option position will reflect, among other things, the historical price volatility of the underlying investment, the current market value of the underlying investment, the time remaining until expiration, the relationship of the exercise price to the market price of the underlying investment, and general market conditions.

The Fund may effectively terminate its right or obligation under an option by entering into a closing transaction. For example, the Fund may terminate its obligation under a call or put option that

it had written by purchasing an identical call or put option; this is known as a closing purchase transaction. Conversely, the Fund may terminate a position in a put or call option it had purchased by writing an identical put or call option; this is known as a closing sale transaction. Closing transactions permit the Fund to realize the profit or limit the loss on an option position prior to its exercise or expiration.

The writing and purchasing of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. Imperfect correlation between the options and securities markets may detract from the effectiveness of the option transaction.

Variable Rate Debt Instruments

The Fund may invest in variable rate debt instruments. Variable rate securities provide for a periodic adjustment in the interest rate paid on the obligations. The terms of such obligations must provide that interest rates are adjusted periodically based upon an interest rate adjustment index as provided in the respective obligations. The adjustment intervals may be regular, and range from daily up to annually, or may be based on an event, such as a change in the prime rate.

Asset-Backed and Receivable-Backed Securities

Asset-backed and receivable-backed securities are undivided fractional interests in pools of consumer loans (unrelated to mortgage loans) held in a trust. Payments of principal and interest are passed through to certificate holders and are typically supported by some form of credit enhancement, such as a letter of credit, surety bond, limited guaranty or senior/subordination. The degree of credit enhancement varies, but generally amounts to only a fraction of the asset-backed or receivable-backed security's par value until exhausted. If the credit enhancement is exhausted, certificate holders may experience losses or delays in payment if the required payments of principal and interest are not made to the trust with respect to the underlying loans. The value of these securities also may change because of changes in the market's perception of the creditworthiness of the servicing agent for the loan pool, the originator of the loans or the financial institution providing the credit enhancement. Asset-backed and receivable-backed securities are ultimately dependent upon payment of consumer loans by individuals, and the certificate holder generally has no recourse against the entity that originated the loans. The underlying loans are subject to prepayments which shorten the securities' weighted average life and may lower their return. As prepayments flow through at par, total returns would be affected by the prepayments: if a security were trading at a premium, its total return would be lowered by prepayments, and if a security were trading at a discount, its total return would be increased by prepayments.

PORTFOLIO TURNOVER

Although the Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. The Fund's portfolio turnover rate is a measure of the Fund's portfolio activity, and is calculated by dividing the lesser of purchases or sales of securities by the average value of the portfolio securities held during the period. A high rate of portfolio turnover (over 100%) may involve correspondingly greater transaction costs, which must be borne directly by the Fund and ultimately by its shareholders. High portfolio turnover may result in the realization of substantial net capital gains. To the extent short-term capital gains are realized, distributions

attributable to such gains will be ordinary income for federal income tax purposes. The Fund's portfolio turnover rate for the fiscal year ended September 30, 2016 was 6%. The Fund's portfolio turnover rate for the fiscal year ended September 30, 2017 was 15%.

INVESTMENT RESTRICTIONS

The Fund has adopted the following investment restrictions that may not be changed without approval by a "majority of the outstanding shares" of the Fund which, as used in this SAI, means the vote of the lesser of (a) 67% or more of the shares of the Fund represented at a meeting, if the holders of more than 50% of the outstanding shares of the Fund are present or represented by proxy, or (b) more than 50% of the outstanding shares of the Fund.

1. Borrowing Money. The Fund will not borrow money, except (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of the Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of the Fund's total assets at the time when the borrowing is made. This limitation does not preclude the Fund from entering into reverse repurchase transactions, provided that the Fund has an asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions.
2. Senior Securities. The Fund will not issue senior securities. This limitation is not applicable to activities that may be deemed to involve the issuance or sale of a senior security by the Fund, provided that the Fund's engagement in such activities is consistent with or permitted by the 1940 Act, the rules and regulations promulgated thereunder or interpretations of the Securities and Exchange Commission ("SEC") or its staff.
3. Underwriting. The Fund will not act as underwriter of securities issued by other persons. This limitation is not applicable to the extent that, in connection with the disposition of portfolio securities (including restricted securities), the Fund may be deemed an underwriter under certain federal securities laws.
4. Real Estate. The Fund will not purchase or sell real estate. This limitation is not applicable to investments in marketable securities which are secured by or represent interests in real estate. This limitation does not preclude the Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts).
5. Commodities. The Fund will not purchase or sell commodities unless acquired as a result of ownership of securities or other investments. This limitation does not preclude the Fund from purchasing or selling options or futures contracts, from investing in securities or other instruments backed by commodities or from investing in companies which are engaged in a commodities business or have a significant portion of their assets in commodities.
6. Loans. The Fund will not make loans to other persons, except (a) by loaning portfolio securities, (b) by engaging in repurchase agreements, or (c) by purchasing nonpublicly offered debt securities. For purposes of this limitation, the term "loans" shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other securities.

7. Concentration. The Fund will not invest 25% or more of its total assets in a particular industry. This limitation is not applicable to investments in obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities or repurchase agreements with respect thereto.
8. Diversification. The Fund will not invest in the securities of any issuer if, immediately after such investment, less than 75% of the total assets of the Fund will be invested in cash and cash items (including receivables), government securities, securities of other investment companies or other securities for the purposes of this calculation limited in respect of any one issuer to an amount (determined immediately after the latest acquisition of securities of the issuer) not greater in value than 5% of the total assets of the Fund and to not more than 10% of the outstanding voting securities of such issuer.

The Fund observes the following policies, which are not deemed fundamental and which may be changed without shareholder vote.

1. Pledging. The Fund will not mortgage, pledge, hypothecate or in any manner transfer, as security for indebtedness, any assets of the Fund except as may be necessary in connection with borrowings described in Fundamental limitation (1) above. Margin deposits, security interests, liens and collateral arrangements with respect to transactions involving options, futures contracts, short sales and other permitted investments and techniques are not deemed to be a mortgage, pledge or hypothecation of assets for purposes of this limitation.
2. Borrowing. The Fund will not purchase any security while borrowings (including reverse repurchase agreements) representing more than 5% of its total assets are outstanding. The Fund will not enter into reverse repurchase agreements.
3. Margin Purchases. The Fund will not purchase securities or evidences of interest thereon on "margin." This limitation is not applicable to short-term credit obtained by the Fund for the clearance of purchases and sales or redemption of securities, or to arrangements with respect to transactions involving options, futures contracts, short sales and other permitted investments and techniques.
4. Repurchase Agreements. The Fund will not invest more than 5% of its net assets in repurchase agreements.
5. Illiquid Investments. The Fund will not purchase securities for which there are legal or contractual restrictions on resale and other illiquid securities.

If a restriction on the Fund's investments is adhered to at the time an investment is made, a subsequent change in the percentage of Fund assets invested in certain securities or other instruments, or change in average duration of the Fund's investment portfolio, resulting from changes in the value of the Fund's total assets, will not be considered a violation of the restriction; provided, however, that the asset coverage requirement applicable to borrowings shall be maintained in the manner contemplated by applicable law.

INVESTMENT ADVISER

The Adviser. Gratus serves as investment adviser to the Fund. Gratus is a Delaware Limited Liability Company located at 3350 Riverwood Parkway, Suite 1550, Atlanta, GA 30339. Gratus is a wholly owned subsidiary of Focus Operating, LLC, a Delaware limited liability company (“Focus Operating”) located at 825 Third Avenue, 27th Floor, New York, NY 10022. Focus Operating, a holding company, is the managing member of Gratus based on its ownership of Gratus. Focus Operating is a majority owned subsidiary of Focus Financial Partners, LLC, a Delaware limited liability company (“Focus Financial Partners”) located at 825 Third Avenue, 27th Floor, New York, NY 10022. Focus Financial Partners controls Focus Operating through its ownership interest in Focus Operating. As of September 30, 2017, Gratus had approximately \$1.53 billion in assets under management.

Under the terms of the investment advisory agreement (the “Agreement”), the Adviser is responsible for managing the Fund’s investments, subject to oversight by the Board. The Adviser provides investment advisory services and pays most of the Fund’s expenses (with certain exceptions noted below) in return for a “universal fee.” For its services to the Fund, the Adviser is entitled to receive an annual fee equal to 1.10% of the Fund’s average daily net assets. The Fund, not the Adviser, pays the following expenses: brokerage fees and commissions, indirect costs of investing in other investment companies, taxes, borrowing costs (such as (a) interest and (b) dividend expenses on securities sold short), extraordinary or nonrecurring expenses, such as litigation, and any 12b-1 fees.

The Adviser may make payments to banks or other financial institutions that provide shareholder services and administer shareholder accounts. If a bank or other financial institution were prohibited from continuing to perform all or a part of such services, management of the Fund believes that there would be no material impact on the Fund or its shareholders. Banks and other financial institutions may charge their customers fees for offering these services to the extent permitted by applicable regulatory authorities, and the overall return to those shareholders availing themselves of the bank services will be lower than to those shareholders who do not. The Fund may from time to time purchase securities issued by banks and other financial institutions which provide such services; however, in selecting investments for the Fund, no preference will be shown for such securities.

Prior to May 1, 2016, Spectrum Advisory Services, Inc. (“Spectrum”), was the Fund’s investment adviser pursuant to a previous advisory agreement that contained materially the same terms as the Agreement. Under the agreement with Spectrum, the Fund paid Spectrum a universal fee equal to 1.10% of the Fund’s average daily net assets. Spectrum was controlled by the previous portfolio manager of the Fund, Marc Heilweil.

The following table describes the advisory fees paid to Spectrum prior to May 1, 2016 and to the Adviser after May 1, 2016 by the Fund for the fiscal periods and years indicated:

Fiscal Year Ended	Advisory Fees Accrued	Total Expenses Reimbursed and/or Fees		Net Advisory Fees Paid
		Waived		
October 31, 2015	\$724,025	\$0		\$724,025
September 30, 2016*	\$617,606	\$0		\$617,606
September 30, 2017	\$753,617	\$0		\$753,617

* For the period November 1, 2015 through September 30, 2016. For the period November 1, 2015 through April 30, 2016, the Advisory Fees paid to Spectrum was \$283,426. For the period May 1, 2016 through September 30, 2016, the Advisory fees paid to Gratus was \$247,748.

The Adviser may make payments to banks or other financial institutions that provide shareholder services and administer shareholder accounts. If a bank or other financial institution were prohibited from continuing to perform all or a part of such services, management of the Fund believes that there would be no material impact on the Fund or its shareholders. Banks and other financial institutions may charge their customers fees for offering these services to the extent permitted by applicable regulatory authorities, and the overall return to those shareholders availing themselves of the bank services will be lower than to those shareholders who do not. The Fund may from time to time purchase securities issued by banks and other financial institutions which provide such services; however, in selecting investments for the Fund, no preference will be shown for such securities.

PORTFOLIO MANAGER

Portfolio Manager

As described in the Prospectus, Todd Jones serves as the portfolio manager for the Fund (the “Portfolio Manager”) and is primarily responsible for making all investment decisions of the Fund. As of September 30, 2017, the Portfolio Manager was responsible for the management of the following types of accounts, including the Fund:

Account Type	Number of Accounts by Account Type	Total Assets By Account Type	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee
Registered Investment Companies	1	\$ 71,972,528	0	None
Pooled Investment Vehicles	1	\$ 20,218,857	0	None
Other Accounts	1,282	\$ 1,144,808,615	0	None

Compensation

The Portfolio Manager is compensated for his services by the Adviser. The Portfolio Manager’s compensation consists of a fixed salary and discretionary bonus, unrelated to the Fund’s performance or asset level.

Conflicts of Interest

As set forth above, the Portfolio Manager provides investment advisory and other services to clients other than the Fund. There may be circumstances under which the Portfolio Manager will cause a separate account to commit a larger percentage of its assets to an investment opportunity than the percentage of the Fund’s assets that the Portfolio Manager commits to such investment. There also may be circumstances under which the Portfolio Manager purchases or sells an investment for a separate account and does not purchase or sell the same investment for the Fund, or purchases or sells an investment for the Fund and does not purchase or sell the same investment for the other account.

It is generally the Adviser’s policy that investment decisions for all accounts managed by the Portfolio Manager be made based on a consideration of their respective investment objectives and policies, and other needs and requirements affecting the accounts and that investment transactions

and opportunities be fairly allocated among the Fund and other accounts. For example, the Adviser has written policies and procedures with respect to allocation of block trades and/or investment opportunities among the Fund and other clients of the Adviser. When feasible, the Portfolio Manager will group or block various orders to more efficiently execute orders and receive reduced commissions in order to benefit the Fund and other accounts of the Adviser. In the event that more than one client wants to purchase or sell the same security on a given date and limited quantities are available, the purchases and sales will normally be made on a pro rata average price per share basis.

In addition, the Portfolio Manager may also carry on investment activities for his own account(s) and/or the accounts of immediate family members. Conflicts may arise as a result of the Portfolio Manager's differing economic interests in respect of such activities, such as with respect to allocating investment opportunities. Pursuant to the Code of Ethics adopted by each of the Trust and the Adviser, the Portfolio Manager is prohibited from effecting transactions for his personal accounts which are contrary to recommendations being made to the Fund. In addition, the Portfolio Manager is prohibited from competing with the Fund in connection with such transactions.

Ownership of Securities

As of September 30, 2017, the Portfolio Manager beneficially owned the following amounts in the Fund:

Portfolio Manager	Dollar Range of Shares Beneficially Owned in the Marathon Portfolio Value Fund
Todd Jones	\$1- \$10,000

ALLOCATION OF BROKERAGE

Specific decisions to purchase or sell securities for the Fund are made by the Portfolio Manager, who is an employee of the Adviser. Generally, the Adviser is authorized by the Trustees to allocate the orders placed by it on behalf of the Fund to brokers or dealers who may, but need not, provide research or statistical material or other services to the Fund or the Adviser for the Fund's use. Such allocation is to be in such amounts and proportions as the Adviser may determine.

In selecting a broker or dealer to execute each particular transaction, the Adviser will generally take the following into consideration:

- the best net price available;
- the reliability, integrity and financial condition of the broker or dealer;
- the size of and difficulty in executing the order; and
- the value of the expected contribution of the broker or dealer to the investment performance of the Fund on a continuing basis.

Brokers or dealers executing a portfolio transaction on behalf of the Fund may receive a commission in excess of the amount of commission another broker or dealer would have charged for executing the transaction if the Adviser determines in good faith that such commission is reasonable in relation to the value of brokerage and research services provided to the Fund. In allocating portfolio brokerage, the Adviser may select brokers or dealers who also provide brokerage, research and other services to other accounts over which the Adviser exercises investment discretion. Research services

include supplemental research, securities and economic analyses, statistical services and information with respect to the availability of securities or purchasers or sellers of securities and analyses of reports concerning performance of accounts. Some of the services received as the result of Fund transactions may primarily benefit accounts other than the Fund, while services received as the result of portfolio transactions effected on behalf of those other accounts may primarily benefit the Fund. It is the opinion of the Board of Trustees and the Adviser that the review and study of the research and other information will not reduce the overall cost to the Adviser of performing its duties to the Fund under the Agreement.

Over-the-counter transactions may be placed with broker-dealers if the Adviser is able to obtain best execution (including commissions and price). Over-the-counter transactions may also be placed directly with principal market makers. Fixed income securities are normally purchased directly from the issuer, an underwriter or a market maker. Purchases include a concession paid by the issuer to the underwriter and the purchase price paid to a market maker may include the spread between the bid and asked prices.

To the extent that the Fund and another of the Adviser's clients seek to acquire the same security at about the same time, the Fund may not be able to acquire as large a position in such security as it desires or it may have to pay a higher price for the security. Similarly, the Fund may not be able to obtain as large an execution of an order to sell or as high a price for any particular portfolio security if the other client desires to sell the same portfolio security at the same time. On the other hand, if the same securities are bought or sold at the same time by more than one client, the resulting participation in volume transactions could produce better executions for the Fund. In the event that more than one client wants to purchase or sell the same security on a given date, the purchases and sales will normally be made by random client selection.

The following table describes the brokerage commissions paid by the Fund for the fiscal periods and years indicated:

Fiscal Year Ended	Fiscal Period Ended	Fiscal Year Ended
October 31, 2015	September 30, 2016*	September 30, 2017
\$1,974	\$774	\$245

* For the period November 1, 2015 through September 30, 2016

POLICIES AND PROCEDURES FOR DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust has adopted policies and procedures that govern the disclosure of the Fund's portfolio holdings. These policies and procedures are designed to ensure that such disclosure is in the best interests of Fund shareholders.

It is the Trust's policy to: (1) ensure that any disclosure of portfolio holdings information is in the best interest of Trust shareholders; (2) protect the confidentiality of portfolio holdings information; (3) have procedures in place to guard against personal trading based on the information; and (4) ensure that the disclosure of portfolio holdings information does not create conflicts between the interests of the Trust's shareholders and those of the Trust's affiliates.

The Fund discloses its portfolio holdings by mailing the annual and semi-annual reports to shareholders approximately two months after the end of the fiscal year and semi-annual period. In addition, the Fund discloses its portfolio holdings reports on Forms N-CSR and Form N-Q two months after the end of each quarter/semi-annual period.

The Rating Agencies may make the Fund's top portfolio holdings available on their websites and may make the Fund's complete portfolio holdings available to their subscribers for a fee. Neither the Fund, the Adviser, nor any of its affiliates receive any portion of this fee. Information released to Rating Agencies is not released under conditions of confidentiality nor is it subject to prohibitions on trading based on the information.

Under limited circumstances, as described below, the Fund's portfolio holdings may be disclosed to, or known by, certain third parties in advance of their filing with the SEC on Form N-CSR or Form N-Q. In each case, a determination has been made that such advance disclosure is supported by a legitimate business purpose and that the recipient is subject to a duty to keep the information confidential.

Adviser. Personnel of the Adviser, including personnel responsible for managing the Fund's portfolio, may have full daily access to Fund portfolio holdings since that information is necessary in order for them to provide management, administrative, and investment services to the Fund. As required for purposes of analyzing the impact of existing and future market changes on the prices, availability, demand and liquidity of such securities, as well as for the assistance of portfolio managers in the trading of such securities, Adviser personnel may also release and discuss certain portfolio holdings with various broker-dealers.

Gemini Fund Services, LLC. Gemini Fund Services, LLC is the transfer agent, fund accountant, administrator and custody administrator for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

Huntington National Bank. Huntington National Bank is custodian for the Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

Cohen & Company, Ltd. Cohen & Company, Ltd. is the Fund's independent registered public accounting firm; therefore, its personnel have access to the Fund's portfolio holdings in connection with auditing of the Fund's annual financial statements and providing assistance and consultation in connection with SEC filings.

Counsel to the Trust and Counsel to the Independent Trustees. Counsel to the Trust, Counsel to the Independent Trustees and their respective personnel have access to the Fund's portfolio holdings in connection with the review of the Fund's annual and semi-annual shareholder reports and SEC filings.

Additions to List of Approved Recipients

The Trust's Chief Compliance Officer is the person responsible, and whose prior approval is required, for any disclosure of the Fund's portfolio securities at any time or to any persons other than those described above. In such cases, the recipient must have a legitimate business need for the information and must be subject to a duty to keep the information confidential. There are no ongoing arrangements in place with respect to the disclosure of portfolio holdings. In no event shall the Fund, the Adviser, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

Compliance With Portfolio Holdings Disclosure Procedures

The Trust's Chief Compliance Officer will report periodically to the Board with respect to compliance with the Fund's portfolio holdings disclosure procedures, and from time to time will provide the Board any updates to the portfolio holdings disclosure policies and procedures.

There is no assurance that the Trust's policies on disclosure of portfolio holdings will protect the Fund from the potential misuse of holdings information by individuals or firms in possession of that information.

OTHER SERVICE PROVIDERS

Fund Administration, Fund Accounting and Transfer Agent Services

Gemini Fund Services, LLC ("GFS"), which has its principal office at 80 Arkay Drive, Hauppauge, New York 11788, serves as administrator, fund accountant and transfer agent for the Fund pursuant to a Fund Services Agreement (the "Agreement") with the Trust and subject to the supervision of the Board. GFS is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds. GFS is an affiliate of the Distributor. GFS may also provide persons to serve as officers of the Fund. Such officers may be directors, officers or employees of GFS or its affiliates.

The Agreement became effective on February 23, 2012 and remained in effect for two years from the applicable effective date for the Fund, and will continue in effect for successive twelve-month periods provided that such continuance is specifically approved at least annually by a majority of the Board. The Agreement is terminable by the Board or GFS on 90 days' written notice and may be assigned by either party, provided that the Trust may not assign this agreement without the prior written consent of GFS. The Agreement provides that GFS shall be without liability for any action reasonably taken or omitted pursuant to the Agreement.

Under the Agreement, GFS performs administrative services, including: (1) monitoring the performance of administrative and professional services rendered to the Trust by others service providers; (2) monitoring Fund holdings and operations for post-trade compliance with the Fund's registration statement and applicable laws and rules; (3) preparing and coordinating the printing of semi-annual and annual financial statements; (4) preparing selected management reports for performance and compliance analyses; (5) preparing and disseminating materials for and attending and participating in meetings of the Board; (6) determining income and capital gains available for distribution and calculate distributions required to meet regulatory, income, and excise tax requirements; (7) reviewing the Trust's federal, state, and local tax returns as prepared and signed by the Trust's independent public accountants; (8) preparing and maintaining the Trust's operating expense budget to determine proper expense accruals to be charged to the Fund to calculate its daily NAV; (9) assisting in and monitoring the preparation, filing, printing and where applicable, dissemination to shareholders of amendments to the Trust's Registration Statement on Form N-1A, periodic reports to the Trustees, shareholders and the SEC, notices pursuant to Rule 24f-2, proxy materials and reports to the SEC on Forms N-SAR, N-CSR, N-Q and N-PX; (10) coordinating the Trust's audits and examinations by assisting the Fund's independent public accountants; (11) determining, in consultation with others, the jurisdictions in which shares of the Trust shall be registered or qualified for sale and facilitate such registration or qualification; (12) monitoring sales of shares and ensuring that the shares

are properly and duly registered with the SEC; (13) monitoring the calculation of performance data for the Fund; (14) preparing, or causing to be prepared, expense and financial reports; (15) preparing authorization for the payment of Trust expenses and pay, from Trust assets, all bills of the Trust; (16) providing information typically supplied in the investment company industry to companies that track or report price, performance or other information with respect to investment companies; (17) upon request, assisting the Fund in the evaluation and selection of other service providers, such as independent public accountants, printers, EDGAR providers and proxy solicitors (such parties may be affiliates of GFS); and (18) performing other services, recordkeeping and assistance relating to the affairs of the Trust as the Trust may, from time to time, reasonably request.

GFS also provides the Fund with accounting services, including: (i) daily computation of NAV; (ii) maintenance of security ledgers and books and records as required by the 1940 Act; (iii) production of the Fund's listing of portfolio securities and general ledger reports; (iv) reconciliation of accounting records; (v) calculation of yield and total return for the Fund; (vi) maintaining certain books and records described in Rule 31a-1 under the 1940 Act, and reconciling account information and balances among the Fund's custodian and Adviser; and (vii) monitoring and evaluating daily income and expense accruals, and sales and redemptions of shares of the Fund.

GFS also acts as transfer, dividend disbursing, and shareholder servicing agent for the Fund pursuant to the Agreement. Under the Agreement, GFS is responsible for administering and performing transfer agent functions, dividend distribution, shareholder administration, and maintaining necessary records in accordance with applicable rules and regulations.

For all operational services, including, but not limited to Fund Accounting, Fund Administration, Transfer Agency, Legal Fees, Audit Fees, Compliance Services and Custody Fees, the Fund pay GFS a unitary which scales downward based upon net assets for all operational services, including, but not limited to Fund Accounting, Fund Administration, Transfer Agency, Legal Fees, Audit Fees, Compliance Services and Custody Fees. Fund basis point fees will be calculated based upon the average net assets of the Fund for the previous month.

For the fiscal periods and years ended October 31st and September 30th, the Fund incurred the following fees in accordance with the agreement:

Type of Fee:	2015	2016	2017
Administration	\$52,669	\$45,007	\$54,807
Fund Accounting	\$28,085	\$25,394	\$29,071
Transfer Agent	\$19,131	\$16,031	\$16,222

Custodian

Huntington National Bank, 41 South High Street, Columbus, Ohio 43215, serves as the custodian of the Fund's assets pursuant to a custody agreement (the "Custody Agreement") by and between the Custodian and the Trust on behalf of the Fund. The Custodian's responsibilities include safeguarding and controlling the Fund's cash and securities, handling the receipt and delivery of securities, and collecting interest and dividends on the Fund's investments. Pursuant to the Custody Agreement, the Custodian also maintains original entry documents and books of record and general ledgers; posts cash receipts and disbursements; and records purchases and sales based upon communications from the Adviser. The Fund may employ foreign sub-custodians that are approved by the Board to hold foreign assets.

Compliance Services

Northern Lights Compliance Services, LLC ("NLCS"), located at 80 Arkay Drive, Hauppauge, New York 11788, an affiliate of GFS and the Distributor, provides a Chief Compliance Officer to the Trust as well as related compliance services pursuant to a consulting agreement between NLCS and the Trust. NLCS's compliance services consist primarily of reviewing and assessing the policies and procedures of the Trust and its service providers pertaining to compliance with applicable federal securities laws, including Rule 38a-1 under the 1940 Act. For the services rendered to the Fund by NLCS, the Fund pays NLCS an annual fixed fee and an asset based fee, which scales downward based upon the Fund's net assets. The Fund also pays NLCS for any out-of-pocket expenses. For the fiscal year ended October 31, 2015, the Fund paid \$15,500 for compliance service fees. For the fiscal period ended September 30, 2016, the Fund paid \$14,208 for compliance service fees. For the fiscal period ended September 30, 2017, the Fund paid \$20,000 for compliance service fees.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Fund has selected Cohen & Company, Ltd., 1350 Euclid Avenue, Suite 800, Cleveland, Ohio 44115, as its independent registered public accounting firm for the current fiscal period. The firm provides services including (i) audit of annual financial statements, and (ii) assistance and consultation in connection with SEC filings.

LEGAL COUNSEL

Thompson Hine LLP, 41 South High Street, Suite 1700, Columbus, Ohio 43215 serves as the Trust's legal counsel.

DISTRIBUTOR

Northern Lights Distributors, LLC, located at 17605 Wright Street Omaha, Nebraska 68130 (the "Distributor") serves as the principal underwriter and national distributor for the shares of the Fund pursuant to an underwriting agreement with the Trust (the "Underwriting Agreement"). The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934 and each state's securities laws and is a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). The offering of the Fund's shares are continuous. The Underwriting Agreement provides that the Distributor, as agent in connection with the distribution of Fund shares, will use reasonable efforts to facilitate the sale of the Fund's shares.

The Underwriting Agreement provides that, unless sooner terminated, it will continue in effect for two years initially and thereafter shall continue from year to year, subject to annual approval by (a) the Board or a vote of a majority of the outstanding shares, and (b) by a majority of the Trustees who are not interested persons of the Trust or of the Distributor by vote cast in person at a meeting called for the purpose of voting on such approval.

The Underwriting Agreement may be terminated by the Fund at any time, without the payment of any penalty, by vote of a majority of the Board of Trustees or by vote of a majority of the outstanding shares of the Fund on 60 days' written notice to the Distributor, or by the Distributor at any time, without

the payment of any penalty, on 60 days' written notice to the Fund. The Underwriting Agreement will automatically terminate in the event of its assignment.

The following table sets forth the total compensation received by the Distributor from Fund during the fiscal period ended September 30, 2017:

<i>Fund</i>	<i>Net Underwriting Discounts and Commissions</i>	<i>Compensation on Redemptions and Repurchases</i>	<i>Brokerage Commissions</i>	<i>Other Compensation</i>
Marathon Value Portfolio	\$0	\$0	\$0	\$0

DESCRIPTION OF SHARES

Each share of beneficial interest of the Trust has one vote in the election of Trustees. Cumulative voting is not authorized for the Trust. This means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees if they choose to do so, and, in that event, the holders of the remaining shares will be unable to elect any Trustees.

Shareholders of the Trust and any other future series of the Trust will vote in the aggregate and not by series except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interest of the shareholders of a particular series or class. Matters such as election of Trustees are not subject to separate voting requirements and may be acted upon by shareholders of the Trust voting without regard to series.

The Trust is authorized to issue an unlimited number of shares of beneficial interest. Each share has equal dividend, distribution and liquidation rights. There are no conversion or preemptive rights applicable to any shares of the Fund. All shares issued are fully paid and non-assessable.

CODE OF ETHICS

The Trust, the Adviser and the Distributor have each adopted codes of ethics under Rule 17j-1 under the 1940 Act that governs the personal securities transactions of their board members, officers and employees who may have access to current trading information of the Trust. Under the code of ethics adopted by the Trust, the Trustees are permitted to invest in securities that may also be purchased by the Fund.

In addition, the Trust has adopted a code of ethics, which applies only to the Trust's executive officers (the "Code") to ensure that these officers promote professional conduct in the practice of corporate governance and management. The purpose behind these guidelines is to promote: (i) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships; (ii) full, fair, accurate, timely, and understandable disclosure in reports and documents that a registrant files with, or submits to, the SEC and in other public communications made by the Fund; (iii) compliance with applicable governmental laws, rule and regulations; (iv) the prompt internal reporting of violations of this Code to an appropriate person or persons identified in the Code; and (v) accountability for adherence to the Code.

PROXY VOTING POLICIES

The Board has adopted Proxy Voting Policies and Procedures ("Policies") on behalf of the Trust, which delegate the responsibility for voting proxies to the Adviser or its designee, subject to the Board's continuing oversight. The Policies require that the Adviser or its designee vote proxies received in a manner consistent with the best interests of the Fund and shareholders. The Policies also require the Adviser or its designee to present to the Board, at least annually, the Adviser's Proxy Policies, or the proxy policies of the Adviser's designee, and a record of each proxy voted by the Adviser or its designee on behalf of the Fund, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest.

Where a proxy proposal raises a material conflict between the Adviser's interests and the Fund's interests, the Adviser will resolve the conflict by voting in accordance with the policy guidelines or at the client's directive using the recommendation of an independent third party. If the third party's recommendations are not received in a timely fashion, the Adviser will abstain from voting the securities held by that client's account. A copy of the Adviser's proxy voting policies is attached hereto as Appendix A.

Information regarding how the Fund voted proxies during the most recent 12-month period ended June 30 is available without charge, upon request, by calling toll free, 1-800-788-6086 and by accessing the information on proxy voting filed by the Fund on Form N-PX on the SEC's website at www.sec.gov. In addition, a copy of the Fund's proxy voting policies and procedures are also available by calling 1-800-788-6086 and will be sent within three business days of receipt of a request.

PURCHASE, REDEMPTION AND PRICING OF FUND SHARES

Calculation of Share Price

As indicated in the Prospectus under the heading "Net Asset Value," the NAV of the Fund's shares, by class, is determined by dividing the total value of the Fund's portfolio investments and other assets, less any liabilities, by the total number of shares outstanding of the Fund, by class.

Generally, the Fund's domestic securities (including underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges) are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Fund's fair value committee in accordance with procedures approved by the Board of Trustees and as further described below. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market.

Certain securities or investments for which daily market quotes are not readily available may be valued, pursuant to guidelines established by the Board of Trustees, with reference to other securities or indices. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity. Short-term investments having a maturity of 60 days or less may be generally valued at amortized cost when it approximated fair value.

Exchange traded options are valued at the last quoted sales price or, in the absence of a sale, at the mean between the current bid and ask prices on the exchange on which such options are traded. Futures and options on futures are valued at the settlement price determined by the exchange. Other securities for which market quotes are not readily available are valued at fair value as determined in good faith by the Board of Trustees or persons acting at their direction. Swap agreements and other derivatives are generally valued daily based upon quotations from market makers or by a pricing service in accordance with the valuation procedures approved by the Board of Trustees.

Under certain circumstances, the Fund may use an independent pricing service to calculate the fair market value of foreign equity securities on a daily basis by applying valuation factors to the last sale price or the mean price as noted above. The fair market values supplied by the independent pricing service will generally reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or the value of other instruments that have a strong correlation to the fair-valued securities. The independent pricing service will also take into account the current relevant currency exchange rate. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities may trade on days when Fund shares are not priced, the value of securities held by the Fund can change on days when Fund shares cannot be redeemed or purchased. In the event that a foreign security's market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before the Fund's calculation of NAV), the security will be valued at its fair market value as determined in good faith by the Fund's fair value committee in accordance with procedures approved by the Board of Trustees as discussed below. Without fair valuation, it is possible that short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that it will prevent dilution of the Fund's NAV by short-term traders. In addition, because the Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of these portfolio securities may change on days when you may not be able to buy or sell Fund shares.

Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services. As a result, the NAV of the Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange ("NYSE") is closed and an investor is not able to purchase, redeem or exchange shares.

Fund shares are valued at the close of regular trading on the NYSE (normally 4:00 p.m., Eastern time) (the "NYSE Close") on each day that the New York Stock Exchange is open. For purposes of calculating the NAV, the Fund normally use pricing data for domestic equity securities received shortly

after the NYSE Close and does not normally take into account trading, clearances or settlements that take place after the NYSE Close. Domestic fixed income and foreign securities are normally priced using data reflecting the earlier closing of the principal markets for those securities. Information that becomes known to the Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of the security or the NAV determined earlier that day.

When market quotations are insufficient or not readily available, the Fund may value securities at fair value or estimate their value as determined in good faith by the Board of Trustees or its designees, pursuant to procedures approved by the Board. Fair valuation may also be used by the Board of Trustees if extraordinary events occur after the close of the relevant market but prior to the NYSE Close.

The Fund may hold securities, such as private placements, interests in commodity pools, other non-traded securities or temporarily illiquid securities, for which market quotations are not readily available or are determined to be unreliable. These securities will be valued at their fair market value as determined using the “fair value” procedures approved by the Board of Trustees. The Board has delegated execution of these procedures to a fair value committee composed of one or more officers from each of the (i) Trust, (ii) administrator, and (iii) Adviser. The committee may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

Fair Value Committee and Valuation Process. The fair value committee is composed of one or more officers from each of the (i) Trust, (ii) administrator, and (iii) Adviser. The applicable investments are valued collectively via inputs from each of these groups. For example, fair value determinations are required for the following securities: (i) securities for which market quotations are insufficient or not readily available on a particular business day (including securities for which there is a short and temporary lapse in the provision of a price by the regular pricing source), (ii) securities for which, in the judgment of the Adviser, the prices or values available do not represent the fair value of the instrument. Factors which may cause the Adviser to make such a judgment include, but are not limited to, the following: only a bid price or an asked price is available; the spread between bid and asked prices is substantial; the frequency of sales; the thinness of the market; the size of reported trades; and actions of the securities markets, such as the suspension or limitation of trading; (iii) securities determined to be illiquid; (iv) securities with respect to which an event that will affect the value thereof has occurred (a “significant event”) since the closing prices were established on the principal exchange on which they are traded, but prior to the Fund’s calculation of its NAV. Specifically, interests in commodity pools or managed futures pools are valued on a daily basis by reference to the closing market prices of each futures contract or other asset held by a pool, as adjusted for pool expenses. Restricted or illiquid securities, such as private placements or non-traded securities are valued via inputs from the Adviser valuation based upon the current bid for the security from two or more independent dealers or other parties reasonably familiar with the facts and circumstances of the security (who should take into consideration all relevant factors as may be appropriate under the circumstances). If the Adviser is unable to obtain a current bid from such independent dealers or other independent parties, the fair value committee shall determine the fair value of such security using the following factors: (i) the type of security; (ii) the cost at date of purchase; (iii) the size and nature of the Fund’s holdings; (iv) the discount from market value of unrestricted securities of the same class at the time of purchase and subsequent thereto; (v) information as to any transactions or offers with respect to the security; (vi) the nature and duration of restrictions on disposition of the security and the existence of any registration rights; (vii) how the yield of the security compares to similar securities of companies of similar or equal

creditworthiness; (viii) the level of recent trades of similar or comparable securities; (ix) the liquidity characteristics of the security; (x) current market conditions; and (xi) the market value of any securities into which the security is convertible or exchangeable.

Standards For Fair Value Determinations. As a general principle, the fair value of a security is the amount that the Fund might reasonably expect to realize upon its current sale. The Trust has adopted Financial Accounting Standards Board Statement of Financial Accounting Standards Codification Topic 820, Fair Value Measurements and Disclosures ("ASC 820"). In accordance with ASC 820, fair value is defined as the price that the Fund would receive upon selling an investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. ASC 820 establishes a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability, developed based on the best information available under the circumstances.

Various inputs are used in determining the value of each Fund's investments relating to ASC 820. These inputs are summarized in the three broad levels listed below.

Level 1 – quoted prices in active markets for identical securities.

Level 2 – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 – significant unobservable inputs (including a Fund's own assumptions in determining the fair value of investments).

The fair value committee takes into account the relevant factors and surrounding circumstances, which may include: (i) the nature and pricing history (if any) of the security; (ii) whether any dealer quotations for the security are available; (iii) possible valuation methodologies that could be used to determine the fair value of the security; (iv) the recommendation of a portfolio manager of the Fund with respect to the valuation of the security; (v) whether the same or similar securities are held by other funds managed by the Adviser for other funds and the method used to price the security in those funds; (vi) the extent to which the fair value to be determined for the security will result from the use of data or formulae produced by independent third parties and (vii) the liquidity or illiquidity of the market for the security.

Board of Trustees' Determination. The Board of Trustees meets at least quarterly to consider the valuations provided by the fair value committee and to ratify the valuations made for the applicable securities. The Board of Trustees considers the reports provided by the fair value committee, including follow up studies of subsequent market-provided prices when available, in reviewing and determining in good faith the fair value of the applicable portfolio securities.

The Trust expects that the NYSE will be closed on the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

Purchase of Shares

Orders for shares received by the Fund in good order prior to the close of business on the NYSE on each day during such periods that the NYSE is open for trading are priced at the public offering price, which is NAV plus any sales charge, or at NAV per share (if no sales charges apply) computed as of the close of the regular session of trading on the NYSE. Orders received in good order after the close of the NYSE, or on a day it is not open for trading, are priced at the close of such NYSE on the next day on which it is open for trading at the next determined NAV per share plus sales charges, if any.

Redemption of Shares

The Fund will redeem all or any portion of a shareholder's shares of the Fund when requested in accordance with the procedures set forth in the "Redemptions" section of the Prospectus. Under the 1940 Act, a shareholder's right to redeem shares and to receive payment therefore may be suspended at times:

(a) when the NYSE is closed, other than customary weekend and holiday closings; (b) when trading on that exchange is restricted for any reason; (c) when an emergency exists as a result of which disposal by the Fund of securities owned is not reasonably practicable or it is not reasonably practicable for the Fund to fairly determine the value of net assets, provided that applicable rules and regulations of the SEC (or any succeeding governmental authority) will govern as to whether the conditions prescribed in (b) or (c) exist; or (d) when the SEC by order permits a suspension of the right to redemption or a postponement of the date of payment on redemption.

In case of suspension of the right of redemption, payment of a redemption request will be made based on the NAV next determined after the termination of the suspension.

Supporting documents in addition to those listed under "Redemptions" in the Prospectus will be required from executors, administrators, trustees, or if redemption is requested by someone other than the shareholder of record. Such documents include, but are not restricted to, stock powers, trust instruments, certificates of death, appointments as executor, certificates of corporate authority and waiver of tax required in some states when settling estates.

TAX STATUS

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. All shareholders should consult a qualified tax adviser regarding their investment in the Fund.

The Fund intends to qualify as regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Tax Code"), which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing of its distributions to shareholders. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying,

the Fund should not be subject to federal income or excise tax on its net investment income or net capital gain, which are distributed to shareholders in accordance with the applicable timing requirements. Net investment income and net capital gain of the Fund will be computed in accordance with Section 852 of the Tax Code.

Net investment income is made up of dividends and interest less expenses. Net capital gain for a fiscal year is computed by taking into account any capital loss carryforward of the Fund. The Fund's net realized capital gains from securities transactions will be distributed only after reducing such gains by the amount of any available capital loss carryforwards. Capital losses incurred in tax years beginning after December 22, 2010 may now be carried forward indefinitely and retain the character of the original loss. Under previously enacted laws, capital losses could be carried forward to offset any capital gains only for eight years, and carried forward as short-term capital losses, irrespective of the character of the original loss. Capital loss carryforwards are available to offset future realized capital gains. To the extent that these carryforwards are used to offset future capital gains it is probable that the amount offset will not be distributed to shareholders. Under pre-enacted laws, capital losses could be carried forward to offset any capital gains for eight years, and carried forward as short-term capital, irrespective of the character of the original loss. Capital loss carry forwards are available to offset future realized capital gains. To the extent that these carry forwards are used to offset future capital gains it is probable that the amount offset will not be distributed to shareholders.

The Fund intends to distribute all of its net investment income, any excess of net short-term capital gains over net long-term capital losses, and any excess of net long-term capital gains over net short-term capital losses in accordance with the timing requirements imposed by the Tax Code and therefore should not be required to pay any federal income or excise taxes. Distributions of net investment income and net capital gain will be made after the end of each fiscal year, and no later than December 31 of each year. Both types of distributions will be in shares of the Fund unless a shareholder elects to receive cash.

To be treated as a regulated investment company under Subchapter M of the Tax Code, the Fund must also (a) derive at least 90% of its gross income from dividends, interest, payments with respect to securities loans, net income from certain publicly traded partnerships and gains from the sale or other disposition of securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to the business of investing in such securities or currencies, and (b) diversify its holdings so that, at the end of each fiscal quarter, (i) at least 50% of the market value of the Fund's assets is represented by cash, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the market value of the Fund's assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of its assets is invested in the securities of (other than U.S. government securities or the securities of other regulated investment companies) any one issuer, two or more issuers which the Fund controls and which are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships.

If the Fund fails to qualify as a regulated investment company under Subchapter M in any fiscal year, it will be treated as a corporation for federal income tax purposes. As such, the Fund would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Shareholders of the Fund generally would not be liable for income tax on the Fund's net investment income or net realized capital gains in their individual capacities. Distributions to shareholders, whether from the Fund's net investment income or net realized

capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of the Fund.

The Fund is subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in Section 4982 of the Tax Code. The formula requires payment to shareholders during a calendar year of distributions representing at least 98% of the Fund's ordinary income for the calendar year and at least 98.2% of its capital gain net income (i.e., the excess of its capital gains over capital losses) realized during the one-year period ending October 31 during such year plus 100% of any income that was neither distributed nor taxed to the Fund during the preceding calendar year. Under ordinary circumstances, the Fund expects to time its distributions so as to avoid liability for this tax.

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans are exempt from income taxation under the Tax Code.

Distributions of taxable net investment income and the excess of net short-term capital gain over net long-term capital loss are taxable to shareholders as ordinary income.

Distributions of net capital gain ("capital gain dividends") generally are taxable to shareholders as long-term capital gain, regardless of the length of time the shares of the Fund have been held by such shareholders.

A redemption of Fund shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder's tax basis in his or her Fund shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of taxable net investment income and net capital gain will be taxable as described above, whether received in additional cash or shares. Shareholders electing to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the NAV of a share on the reinvestment date.

Certain U.S. shareholders, including individuals and estates and trusts are subject to an additional 3.8% Medicare tax on all or a portion of their "net investment income," which should include dividends from the Fund and net gains from the disposition of shares of the Fund. U.S. shareholders are urged to consult their own tax advisors regarding the implications of the additional Medicare tax resulting from an investment in the Fund.

All distributions of taxable net investment income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, will be deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Under the Tax Code, the Fund will be required to report to the Internal Revenue Service all distributions of taxable income and capital gains as well as gross proceeds from the redemption or exchange of Fund shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the Tax Code, distributions of taxable net investment income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax in the case of non-exempt shareholders who fail to furnish the Investment Company with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if the Fund is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

Payments to a shareholder that is either a foreign financial institution (“FFI”) or a non-financial foreign entity (“NFFE”) within the meaning of the Foreign Account Tax Compliance Act (“FATCA”) may be subject to a generally nonrefundable 30% withholding tax on: (a) income dividends paid by a Fund after June 30, 2014 and (b) certain capital gain distributions and the proceeds arising from the sale of Fund shares paid by the Fund after December 31, 2016. FATCA withholding tax generally can be avoided: (a) by an FFI, subject to any applicable intergovernmental agreement or other exemption, if it enters into a valid agreement with the IRS to, among other requirements, report required information about certain direct and indirect ownership of foreign financial accounts held by U.S. persons with the FFI and (b) by an NFFE, if it: (i) certifies that it has no substantial U.S. persons as owners or (ii) if it does have such owners, reports information relating to them. A Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign entity that is a shareholder of a Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

Options, Futures, Forward Contracts and Swap Agreements

To the extent such investments are permissible for the Fund, the Fund's transactions in options, futures contracts, hedging transactions, forward contracts, straddles and foreign currencies will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules), the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders.

To the extent such investments are permissible, certain of the Fund's hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If the Fund's book income exceeds its taxable income, the distribution (if any) of such excess book income will be treated as (i) a dividend to the extent of the Fund's remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of the recipient's basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If the Fund's book income is less than taxable income, the Fund could be required to make distributions exceeding book income to qualify as a regular investment company that is accorded special tax treatment.

Passive Foreign Investment Companies

Investment by the Fund in certain "passive foreign investment companies" ("PFICs") could subject the Fund to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company, which tax cannot be eliminated by making distributions to Fund shareholders. However, the Fund may elect to treat a PFIC as a "qualified electing fund" ("QEF"), in which case the Fund will be required to include its share of the company's income and net capital gains annually, regardless of whether they receives any distribution from the company.

The Fund also may make an election to mark the gains (and to a limited extent losses) in such holdings "to the market" as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund's taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed for the Fund to avoid taxation. Making either of these elections therefore may require the Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund's total return.

Foreign Currency Transactions

The Fund's transactions in foreign currencies, foreign currency-denominated debt securities and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned.

Foreign Taxation

Income received by the Fund from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties and conventions between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of the Fund's total assets at the close of its taxable year consists of securities of foreign corporations, the Fund may be able to elect to "pass through" to the Fund's shareholders the amount of eligible foreign income and similar taxes paid by the Fund. If this election is made, a shareholder generally subject to tax will be required to include in gross income (in addition to taxable dividends actually received) his or her pro rata share of the foreign taxes paid by the Fund, and may be entitled either to deduct (as an itemized deduction) his or her pro rata share of foreign taxes in computing his or her taxable income or to use it as a foreign tax credit against his or her U.S. federal income tax liability, subject to certain limitations. In particular, a shareholder must hold his or her shares (without protection from risk of loss) on the ex-dividend date and for at least 15 more days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a gain dividend. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. Each shareholder will be notified within 60 days after the close of the Fund's taxable year whether the foreign taxes paid by the Fund will "pass through" for that year.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of the Fund's income will flow through to shareholders of the Fund. With respect to the Fund, gains from the sale of securities will be treated as derived from

U.S. sources and certain currency fluctuation gains, including fluctuation gains from foreign currency-denominated debt securities, receivables and payables will be treated as ordinary income derived from U.S. sources. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. A shareholder may be unable to claim a credit for the full amount of his or her proportionate share of the foreign taxes paid by the Fund. The foreign tax credit can be used to offset only 90% of the revised alternative minimum tax imposed on corporations and individuals and foreign taxes generally are not deductible in computing alternative minimum taxable income.

Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was purchased, even though the holder receives no interest payment in cash on the security during the year. In addition, pay-in-kind securities will give rise to income which is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount ("OID") is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. Market discount generally accrues in equal daily installments. The Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by the Fund may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, the Fund will be required to include the acquisition discount, or OID, in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. The Fund may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

A fund that holds the foregoing kinds of securities may be required to pay out as an income distribution each year an amount, which is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). The Fund may realize gains or losses from such liquidations. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Shareholders of the Fund may be subject to state and local taxes on distributions received from the Fund and on redemptions of the Fund's shares.

A brief explanation of the form and character of the distribution accompany each distribution. In January of each year the Fund issues to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisers about the application of federal, state and local and foreign tax law in light of their particular situation.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. The Trust's secretary serves as its Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to, determining that the Fund's Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity and a providing a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Trust may be required to "freeze" the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Trust may be required to transfer the account or proceeds of the account to a governmental agency.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

A principal shareholder is any person who owns (either of record or beneficially) 5% or more of the outstanding shares of a fund. A control person is one who owns, either directly or indirectly more than 25% of the voting securities of a company or acknowledges the existence of control. That shareholder's vote could have more significant effect on matters presented at a shareholder's meeting than votes of other shareholders.

As of January 3, 2018, the following shareholders of record owned 5% or more of the outstanding shares of the Fund:

MANAGEMENT

The business of the Trust is managed under the direction of the Board in accordance with the Agreement and Declaration of Trust and the Trust's By-laws (the "Governing Documents"), which have been filed with the SEC and are available upon request. The Board consists of five individuals, all of whom are not "interested persons" (as defined under the 1940 Act) of the Trust and the Adviser ("Independent Trustees"). Pursuant to the Governing Documents of the Trust, the Trustees shall elect officers including a President, a Secretary, a Treasurer, a Principal Executive Officer and a Principal Accounting Officer. The Board retains the power to conduct, operate and carry on the business of the Trust and has the power to incur and pay any expenses, which, in the opinion of the Board, are necessary or incidental to carry out any of the Trust's purposes. The Trustees, officers, employees and agents of the Trust, when acting in such capacities, shall not be subject to any personal liability except for his or her own bad faith, willful misfeasance, gross negligence or reckless disregard of his or her duties.

Board Leadership Structure. The Board is led by John V. Palancia, who has served as the Chairman of the Board since May 2014. The Board has not appointed a Lead Independent Trustee because all Trustees are Independent Trustees. Under the Trust's Agreement and Declaration of Trust and By-Laws, the Chairman of the Board is responsible for (a) presiding at Board meetings, (b) calling special meetings on an as-needed basis, and (c) execution and administration of Trust policies, including (i) setting the agendas for Board meetings and (ii) providing information to Board members in advance of each Board meeting and between Board meetings. Generally, the Trust believes it best to have a non-executive Chairman of the Board, who together with the President (principal executive officer), are seen by our shareholders, business partners and other stakeholders as providing strong leadership. The Trust believes that its Chairman/Lead Independent Trustee, the independent chair of the Audit Committee, and, as an entity, the full Board of Trustees, provide effective leadership that is in the best interests of the Trust, its Funds and each shareholder.

Board Risk Oversight. The Board of Trustees is comprised entirely of Independent Trustees with an Audit Committee with a separate chair. The Board is responsible for overseeing risk management, and the full Board regularly engages in discussions of risk management and receives compliance reports that inform its oversight of risk management from its Chief Compliance Officer at quarterly meetings and on an ad hoc basis, when and if necessary. The Audit Committee considers financial and reporting risk within its area of responsibilities. Generally, the Board believes that its oversight of material risks is adequately maintained through the compliance-reporting chain where the Chief Compliance Officer is the primary recipient and communicator of such risk-related information.

Trustee Qualifications.

Generally, the Fund believes that each Trustee is competent to serve because of his or her individual overall merits including: (i) experience, (ii) qualifications, (iii) attributes and (iv) skills.

James Jensen has over 40 years of business experience in a wide range of industries including the financial services industry. His experience includes over 25 years of mutual fund board experience with service as chairman of the Audit Committee, chairman of the Nominating and Governance Committee and, for the past eight years, as Chairman of the Board of Wasatch Funds. Since April 2008, Mr. Jensen has served as the Chief Executive Officer of Clearwater Law & Governance Group, where he devotes himself full time to corporate law practice, board governance consulting for operating companies and private investing. In May 2014, Mr. Jensen and his firm conducted the 11th Green River Conference on Corporate Governance for lawyers, accountants, directors and service providers. In 2001, Mr. Jensen co-founded Intelisum, Inc., a company pursuing computer and measurement technology and products, and was Chairman of the Board from 2001 to 2008. From 1986 to 2004, Mr. Jensen held key positions with NPS Pharmaceuticals, Inc., including Vice President, Corporate Development, Legal Affairs and General Counsel and Secretary. In addition to his business experience, Mr. Jensen was Chairman of the Board of Agricon Global Corporation, formerly BayHill Capital Corporation from 2008 to 2014 and has been a Director of the University of Utah Research Foundation since 2001. Mr. Jensen was the founder and first President of the MountainWest Venture Group (now "MountainWest Capital Network") in 1983. Mr. Jensen is a member of the National Association of Corporate Directors Governance. Mr. Jensen graduated with a Bachelor of Arts degree from the University of Utah in 1967 and received degrees of Juris Doctor and Master of Business Administration from Columbia University in 1971.

Patricia Luscombe, CFA, has more than 25 years in financial advisory and valuation services. She has delivered a broad range of corporate finance advice including fairness opinions and valuations. Ms. Luscombe joined Lincoln International in 2007 as a Managing Director and co-head of Lincoln's Valuations & Opinions Group. In this position, she assists regulated investment funds, business development companies, private equity funds and hedge funds in the valuation of illiquid securities for fair value accounting purposes. Ms. Luscombe's clients range from closely-held businesses to large, publicly-traded companies. Previously, Ms. Luscombe spent 16 years with Duff & Phelps Corporation, as a Managing Director in the firm's valuation and financial advisory business. Prior to joining Duff & Phelps Corporation, Ms. Luscombe was an Associate at Smith Barney, a division of Citigroup Capital Markets, Inc., where she managed a variety of financial transactions, including mergers and acquisitions, leveraged buyouts, and equity and debt financings. Ms. Luscombe is a member of the Chicago Chapter of the Association for Corporate Growth, the Chartered Financial Analyst Society of Chicago and former president of the Chicago Finance Exchange. Ms. Luscombe holds a Bachelor of Arts degree in economics from Stanford University, a Master's degree in economics from the University of Chicago and a Master of Business Administration degree from the University of Chicago Booth School of Business. In addition, Ms. Luscombe is licensed under the Series 24, 79 and 63 of FINRA.

John V. Palancia has over 40 years of business experience in the financial services industry including serving as the Director of Global Futures Operations for Merrill Lynch, Pierce, Fenner & Smith, Inc. ("Merrill Lynch") Mr. Palancia possesses an in depth understanding of broker-dealer operations from having served in various management capacities and has held industry registrations in both securities and futures. Based on his service at Merrill Lynch, he also possesses a strong understanding of risk management, balance sheet analysis, compliance and the regulatory framework under which regulated financial entities must operate. Additionally, he is well versed in the regulatory framework under which investment companies must operate based on his service as a member of three other mutual fund boards. This practical and extensive experience in the securities industry provides valuable insight into fund operations and enhances his ability to effectively serve as chairman of the Board of Trustees. Mr. Palancia holds a Bachelor of Science degree in Economics.

Mark H. Taylor has over twenty-five years of academic and professional experience in the accounting and auditing fields which makes him particularly qualified to serve as the Trust's Audit Committee Chair. He holds PhD, Master's and Bachelor's degrees in Accounting and is a licensed Certified Public Accountant. Dr. Taylor chairs the Department of Accountancy in the Weatherhead School of Management at Case Western Reserve University and is the Andrew D. Braden Professor of Accounting and Auditing. Commencing August 2017, Dr. Taylor is serving a three-year term as Vice President-Finance on the Board of Directors of the American Accounting Association (AAA). From 2012 to 2015, he served a 3-year term as President of the Auditing Section of the AAA (Vice-President 2012-2013, President 2013-2014, and Past President (2014-2015)). Dr. Taylor serves as a member of two other mutual fund boards within the Northern Lights Fund Complex, and completed a fellowship in the Professional Practice Group of the Office of the Chief Accountant at the headquarters of the United States Securities Exchange Commission. He also served a three-year term on the AICPA's Auditing Standards Board (2010-2012). Dr. Taylor is a member of two research teams that recently received grants from the Center for Audit Quality to study how auditors manage the process of auditing fair value measurements in financial statements and how accounting firms' tone-at-the top messaging impacts audit performance. Dr. Taylor teaches corporate governance and accounting policy as well as auditing and assurance services and possesses a strong understanding of the regulatory framework under which investment companies operate.

Jeffery D. Young has 38 years of business management experience, including in the transportation industry, including and operations and information technologies. He is currently Co-owner and Vice President of the Latin America Agriculture Development Corporation, an agribusiness exporting fruit to the United States and other Central American countries. He has served as Assistant Vice President of Transportation Systems at Union Pacific Railroad Company, where he was responsible for the development and implementation of large scale command and control systems that support railroad operations and safety. In this position, Mr. Young was heavily involved in the regulatory compliance of safety and mission critical systems. Mr. Young also served as Chairman of the Association of American Railroads Policy Committee and represented both Union Pacific Railroad and the railroad industry in safety and regulatory hearings with the National Transportation Safety Board and the Federal Railroad Administration in Washington, DC. Mr. Young was a member of the Board of Directors of PS Technologies, a Union Pacific affiliate serving as a technology supplier to the railroad industry. His practical business experience and understanding of regulatory compliance provides a different perspective that will bring diversity to Board deliberations.

Trustees and Officers. The Trustees and officers of the Trust, together with information as to their principal business occupations during the past five years and other information, are shown below. Unless otherwise noted, the address of each Trustee and Officer is 17605 Wright Street, Suite 2, Omaha, Nebraska 68130.

William Kimme 1962	Chief Compliance Officer	Since February 2012, indefinite	Senior Compliance Officer of Northern Lights Compliance Services, LLC (since 2011); Due Diligence and Compliance Consultant, Mick & Associates (2009-2011); Assistant Director, FINRA (2000-2009).

*Mr. Malinowski was elected President of the Trust effective August 29, 2017.

Audit Committee. The Board has an Audit Committee that consists solely of Trustees who are not "interested persons" of the Trust within the meaning of the 1940 Act. The Audit Committee's responsibilities include: (i) recommending to the Board the selection, retention or termination of the Trust's independent auditors; (ii) reviewing with the independent auditors the scope, performance and anticipated cost of their audit; (iii) discussing with the independent auditors certain matters relating to the Trust's financial statements, including any adjustment to such financial statements recommended by such independent auditors, or any other results of any audit; (iv) reviewing on a periodic basis a formal written statement from the independent auditors with respect to their independence, discussing with the independent auditors any relationships or services disclosed in the statement that may impact the objectivity and independence of the Trust's independent auditors and recommending that the Board take appropriate action in response thereto to satisfy itself of the auditor's independence; and (v) considering the comments of the independent auditors and management's responses thereto with

respect to the quality and adequacy of the Trust's accounting and financial reporting policies and practices and internal controls. The Audit Committee operates pursuant to an Audit Committee Charter. Dr. Taylor is Chairman of the Audit Committee. During the past fiscal year, the Audit Committee held four meetings.

Compensation of Directors. Effective January 1, 2017, each Trustee who is not affiliated with the Trust or an investment adviser to any series of the Trust will receive a quarterly fee of \$20,000, allocated among each of the various portfolios comprising the Trust, for his or her attendance at the regularly scheduled meetings of the Board of Trustees, to be paid in advance of each calendar quarter, as well as reimbursement for any reasonable expenses incurred. From January 1, 2016 through December 31, 2016, each Trustee who is not affiliated with the Trust or an investment adviser to any series of the Trust received a quarterly fee of \$16,000 for his or her attendance at the regularly scheduled meetings of the Board of Trustees, to be paid in advance of each calendar quarter, as well as reimbursement for any reasonable expenses incurred. Effective January 1, 2017, in addition to the quarterly fees and reimbursements, the Chairman of the Board receives a quarterly fee of \$5,000, and the Audit Committee Chairmen receive a quarterly fee of \$3,750.

Additionally, in the event an in-person meeting of the Board of Trustees other than its regularly scheduled meetings (a "Special Meeting") is required, each Independent Trustee will receive a fee of \$2,500 per Special Meeting, as well as reimbursement for any reasonable expenses incurred, to be paid by the relevant series of the Trust or its investment adviser depending on the circumstances necessitating the Special Meeting. None of the executive officers receive compensation from the Trust.

The table below detail the amount of compensation the Trustees received from the Marathon Value Portfolio during the fiscal period ended September 30, 2017. The Trust does not have a bonus, profit sharing, pension or retirement plan.

Name and Position	Marathon Value Portfolio	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From Fund Complex* Paid to Trustees
James U. Jensen	\$1,983	None	None	\$1,983
Patricia Luscombe	\$1,983	None	None	\$1,983
John V. Palancia	\$2,644	None	None	\$2,644
Mark H. Taylor	\$2,424	None	None	\$2,424
Jeffery D. Young	\$1,983	None	None	\$1,983

* There are currently numerous series comprising the Trust. The term "Fund Complex" refers only to the Fund, and not to any other series of the Trust. For the fiscal year ended September 30, 2016, the aggregate independent Trustees' fees paid by the entire Trust were \$413,000.

Trustees' Ownership of Shares in the Fund. As of December 31, 2017, the Trustees beneficially owned the following amounts in the Fund:

Name of Trustee	Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies*
James U. Jensen	\$10,001-\$50,000	\$10,001-\$50,000
Patricia Luscombe	None	\$10,001-\$50,000

John V. Palancia	None	\$10,001-\$50,000
Mark H. Taylor	None	\$10,001-\$50,000
Jeffery D. Young	None	None

* The "Family of Investment Companies" includes the following registered management investment companies in addition to the Trust: Northern Lights Fund Trust, Northern Lights Fund Trust II, Northern Lights Fund Trust IV and Northern Lights Variable Trust.

FINANCIAL STATEMENTS

The audited financial statements and report of the independent registered public accounting firm required to be included in this Statement of Additional Information are hereby incorporated by reference to the Annual Report for the Fund for the fiscal period ended September 30, 2017. You can obtain the Annual Report without charge by calling the Fund at 1-800-788-6086.

APPENDIX A

PROXY VOTING POLICIES AND PROCEDURES GRATUS CAPITAL, LLC PROXY VOTING GUIDELINES

We have adopted the following proxy voting guidelines as part of our overall goal of maximizing the growth of our clients' assets.

Gratus generally votes proxies in furtherance of the long-term economic value of the underlying securities. We consider each proxy proposal on its own merits, and we make an independent determination of the advisability of supporting or opposing management's position. We believe that the recommendations of management should be given substantial weight, but we will not support management proposals that we believe are detrimental to the underlying value of our clients' positions.

We usually oppose proposals that dilute the economic interest of shareholders, and we also oppose those that reduce shareholders' voting rights or otherwise limit their authority. With respect to takeover offers, Gratus calculates a 'going concern' value for every holding. If the offer approaches or exceeds our value estimate, we will generally vote for the merger, acquisition or leveraged buy-out.

The following guidelines deal with a number of specific issues, particularly in the area of corporate governance. While they are not exhaustive, they do provide a good indication of our general approach to a wide range of issues. They are not hard and fast rules, as, on occasion, we may vote a proxy otherwise than suggested by the guidelines, but departures from the guidelines will be rare, and we will explain the basis for such votes.

I. Directors and Auditors

Gratus generally supports the management slate of directors, although we may withhold our votes if the board has adopted excessive anti-takeover measures.

We favor inclusion of the selection of auditors on the proxy as a matter for shareholder ratification. As a general rule, in the absence of any apparent conflict of interest, we will support management's selection of auditors.

II. Corporate Governance

In the area of corporate governance, Gratus will generally support proxy measures that we believe tend to increase shareholder rights.

A. Confidential Voting. We generally support proposals to adopt confidential voting and independent vote tabulation practices, which we believe lessen potential management pressure on shareholders and thus allow shareholders to focus on the merits of proxy proposals.

B. Greenmail. Unless they are part of anti-takeover provisions, we usually support anti-greenmail proposals because greenmail tends to discriminate against shareholders, other than the greenmailer, and may result in a decreased stock price.

C. Indemnification of Directors. We usually vote in favor of charter or by-law amendments that expand the indemnification of directors or limit their liability for breaches of care, because we believe such measures are important in attracting competent directors and officers.

D. Cumulative Voting Rights. We usually support cumulative voting as an effective method of guaranteeing minority representation on a board.

E. Opt Out of Delaware. We usually support by-law amendments requiring a company to opt out of the Delaware takeover statute because it is undemocratic and contrary to the principle that shareholders should have the final decision on merger or acquisition.

F. Increases in Common Stock. We will generally support an increase in common stock of up to three times the number of shares outstanding and scheduled to be issued, including stock options, provided the increase is not intended to implement a poison pill defense.

Gratus generally votes against the following anti-takeover proposals, as we believe they diminish shareholder rights.

A. Fair Price Amendments. We generally oppose fair price amendments because they may deter takeover bids, but we will support those that consider only a two year price history and are not accompanied by a supermajority vote requirement.

B. Classified Boards. We generally oppose classified boards because they limit shareholder control.

C. Blank Check Preferred Stock. We generally oppose the authorization of blank check preferred stock because it limits shareholder rights and allows management to implement anti-takeover policies without shareholder approval.

D. Supermajority Provisions. We usually oppose supermajority voting requirements because they often detract from the majority's rights to enforce it will.

E. Golden Parachutes. We generally oppose golden parachutes, as they tend to be excessive and self-serving, and we favor proposals, which require shareholder approval of golden parachutes and similar arrangements.

F. Poison Pills. We believe poison pill defenses tend to depress the value of shares. Therefore, we will vote for proposals requiring (1) shareholder ratification of poison pills, (2) sunset provision for existing poison pills, and (3) shareholder vote on redemption of poison pills.

G. Reincorporation. We oppose reincorporation in another state in order to take advantage of a stronger anti-takeover statute.

H. Shareholder Rights. We oppose proposals that would eliminate, or limit, the rights of shareholders to call special meetings and to act by written consent because they detract from basic shareholder authority.

Gratus generally votes on other corporate governance issues as follows:

A. Other Business. Absent any compelling grounds, we usually authorize management to vote in its discretion.

B. Differential Voting Rights. We usually vote against the issuance of new classes of stock with differential voting rights, because such rights can dilute the rights of existing shares.

C. Directors-Share Ownership. While we view some share ownership by directors as having a positive effect, we will usually vote against proposals requiring directors to own a specific number of shares.

D. Independent Directors. While we oppose proposals, which would require that a board consist of a majority of independent directors, we may support proposals, which call for some independent positions on the board.

E. Preemptive Rights. We generally vote against preemptive rights proposals, as they may tend to limit share ownership, and they limit management's flexibility to raise capital.

F. Employee Stock Ownership Plans (ESOPs). We evaluate ESOPs on a case-by-case basis. We usually vote for unleveraged ESOPs if they provide for gradual accumulation of moderate levels of stock. For leveraged ESOPs, we examine the company's state of incorporation, existence of super-majority vote rules in the charter, number of shares authorized for ESOP and number of shares held by insiders. We may also examine where the ESOP shares are purchased and the dilutive effect of the purchase. We vote against leveraged ESOPs if all outstanding loans are due immediately upon a change in control or if the ESOP appears to be primarily designed as an anti-takeover device.

III. Compensation and Stock Options Plans

We review compensation plan proposals on a case-by-case basis. We believe that strong compensation programs are needed to attract, hold and motivate good executives and outside directors, and so we generally tend to vote with management on these issues. However, if the proposals appear excessive, or bear no rational relation to company performance, we may vote in opposition.

With respect to compensation plans which utilize stock options or stock incentives, our analyses generally have lead us to vote with management. However, if the awards of options appear excessive, or if the plans reserve an unusually large percentage of the company's stock for the award of options, we may oppose them because of concerns regarding the dilution of shareholder value. Compensation plans that come within the purview of this guideline include long-range compensation plans, deferred compensation plans, long-term incentive plans, performance stock plans, and restricted stock plans and share option arrangements.

IV. Social Issues

Gratus has a fiduciary duty to vote on all proxy issues in furtherance of the long-term economic value of the underlying shares. Consistent with that duty, we will vote on social issues with a view toward promoting good corporate citizenship, but also with the realization that we cannot require a company to go beyond applicable legal requirements or put itself in a noncompetitive position.

We have found that management generally analyzes such issues on the same basis, and so we generally support management's recommendations on social issue proposals. However, if our analysis shows that adoption of such a proposal would have a positive impact on the share value, we may vote in favor.

Examples of proposals in this category include:

1. Anti – Abortion
2. Affirmative Action
3. Animal Rights
 - a. Animal Testing
 - b. Animal Experimentation
 - c. Factory Farming
4. Chemical Releases
5. El Salvador
6. Environmental Issues
 - a. CERES Principles
 - b. Environmental Protection
7. Equal Opportunity
8. Discrimination
9. Government Service
10. Infant Formula
11. Israel
12. Military Contracts
13. Northern Ireland
14. Nuclear Power
 - a. Nuclear Waste
 - b. Nuclear Energy Business
15. Planned Parenthood Funding
16. Political Contributions
17. South Africa
 - a. Sullivan Principles
18. Space Weapons
19. Tobacco-Related Products
20. World Debt
