FUND SUMMARY

Investment Objective

The investment objective of the Marathon Value Portfolio (the “Fund”) is to provide shareholders with long-term capital appreciation in a well-diversified portfolio.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment)

Maximum Sales Charge (Load) Imposed on Purchases	NONE
Maximum Deferred Sales Charge (Load).....	NONE
Maximum Sales Charge (Load) Imposed on Reinvested Dividends and other Distributions.....	NONE
Redemption Fee.....	NONE

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees ⁽¹⁾	1.10%
Distribution and/or Service (12b-1) Fees.....	NONE
Other Expenses.....	0.00%
Total Annual Fund Operating Expenses.....	1.10%

(1) The Fund’s adviser, Gratus Capital, LLC (“Gratus” or the “Adviser”) provides investment advisory services and pays most of the Fund’s expenses (with certain exceptions) in return for a “universal fee.”

Expense Example:

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

1 YEAR	3 YEARS	5 YEARS	10 YEARS
\$112	\$350	\$606	\$1,340

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 15% of the average value of its portfolio.

Principal Investment Strategies

The Fund invests primarily in common and preferred stocks (including common stock equivalents such as rights and warrants) of U.S. companies that have potential “value” in the Adviser’s judgment. The Fund will invest in shares of companies that the Adviser believes will appreciate in value over time and that are either underpriced or reasonably priced in relation to their worth as a business. The Fund may purchase stock of a company that is labeled a “growth” company, provided that the Adviser believes that the company’s stock is selling at a reasonable price relative to its value. The Adviser intends for the Fund to provide investors with exposure to a wide number of industries. The Adviser’s decision to purchase a stock is made without regard to the market capitalization of the company or its weighting in any market index. The Fund may invest in companies of any market capitalization, which includes large-, mid-, and small-cap securities.

In valuing a company, the Adviser takes a long-term approach, with an emphasis on management strength and the fundamental profitability of the company’s business. The Fund may also purchase a company’s stock if the Adviser’s assessment of the private market value of the company (i.e., the price at which knowledgeable buyers and sellers would exchange a comparable business) exceeds, by a material amount, the price of the security.

The Fund also may invest in longer term debt securities (maturities greater than 270 days), convertible debt securities, exchange-traded funds (“ETFs”), real estate investment trusts (“REITs”), options and convertible preferred stocks. The Fund may also invest in leveraged or inverse ETFs. The Fund may invest in lower-rated debt securities of a company if the Adviser believes that the company’s junk bonds offer more potential for participating in the company’s long-term prospects than could be achieved by investing in the company’s other available securities. The Fund may invest up to 5% of its assets in junk bonds, rated at the time of purchase, BB/Ba or lower by S&P or Moody’s or, unrated, but determined to be of comparable quality by the Adviser. The Fund may retain securities that are subsequently downgraded or in default, or the Adviser may sell them in an orderly manner. The Fund also may invest up to 25% of its assets, measured at the time of purchase, in equity or debt securities of any maturity of foreign issuers, directly or through American Depositary Receipts (“ADRs”). ADRs are certificates held in trust by a U.S. bank or trust company evidencing ownership of shares of foreign-based issuers, and are an alternative to purchasing foreign securities in their national markets and currencies.

The Fund intends to remain substantially invested in shares of common stock and preferred stock and other equity securities. If, however, the Adviser believes that sufficient investment opportunities that meet the Fund’s investment criteria are not available the Fund may invest up to 20% of its total assets, measured at the time of purchase, in money market funds, investment grade money market instruments, fixed income securities (including investment grade corporate bonds or notes, U.S. government or government agency securities and mortgage-backed securities), repurchase agreements, commercial paper, other short-term debt securities (maturities of 270 days or less) and cash equivalents. As a result of holding cash or cash equivalents, the Fund may be able to meet shareholder redemptions without selling stocks and realizing gains and losses. However, the Fund may not achieve its investment objective when holding a substantial cash position.

Principal Investment Risks

As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. The Fund is not intended to be a complete investment program. Many factors affect the Fund’s net asset value (“NAV”) and performance.

- **Market Risk.** The prices of securities held by the Fund may decline in response to certain events affecting the markets. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value.
- **Value Risk.** A company may be undervalued due to market or economic conditions, temporary earnings declines, unfavorable developments affecting the company and other factors. Securities purchased by the Fund that do not realize their full economic value may reduce the Fund’s return.
- **Growth Risk.** Growth-oriented securities purchased by the Fund may involve large price swings and potential for loss. If the Adviser’s perceptions of a company’s growth potential are wrong, the securities purchased may not perform as expected, reducing the Fund’s return.
- **Management Risk.** The Adviser’s investment approach may fail to produce the intended results.
- **Small-Cap and Mid-Cap Risk.** Stocks of small-capitalization and mid-capitalization companies are riskier than stocks of larger companies. Many of these companies are young and have a limited track record. Their securities may trade less frequently and in more limited volume than those of more mature companies. As a result, small- and mid-cap stocks may be significantly more volatile than larger- cap stocks.
- **Foreign Securities Risk.** When the Fund invests in foreign securities (whether directly or through ADRs), including investments in other investment companies that hold a portfolio of foreign securities, it will be subject to additional risks not typically associated with investing in U.S. Government securities and securities of domestic companies. These risks are heightened to the extent that the Fund invests in securities of foreign companies in emerging markets.
- **Preferred Stock Risk.** Preferred stock may be subject to a number of risks, including that the issuer, under certain conditions, may skip or defer dividend payments for long periods of time. In addition, holders of preferred stock typically do not have any voting rights, except in cases when dividends are in arrears beyond stated time periods.
- **Fixed Income Risk.** The issuer of a fixed income security may not be able to make interest and principal payments when due. Generally, the lower the credit rating of a security, the greater the risk that the issuer will default on its obligation. Typically, a rise in interest rates causes a decline in the value of fixed income securities. The value of fixed income securities typically falls when an issuer’s credit quality declines and may even become worthless if an issuer defaults. Recently, interest rates have been historically low. Current conditions may result in a rise in interest rates, which in turn may result in a decline in the value of the bond investments held by the Fund. As a result, for the present, interest rate risk may be heightened.
- **Junk Bond Risk.** To the extent the Fund invests in high yield securities (junk bonds), it will be subject to greater levels of interest rate, liquidity and credit risks than funds that do not invest in such securities.

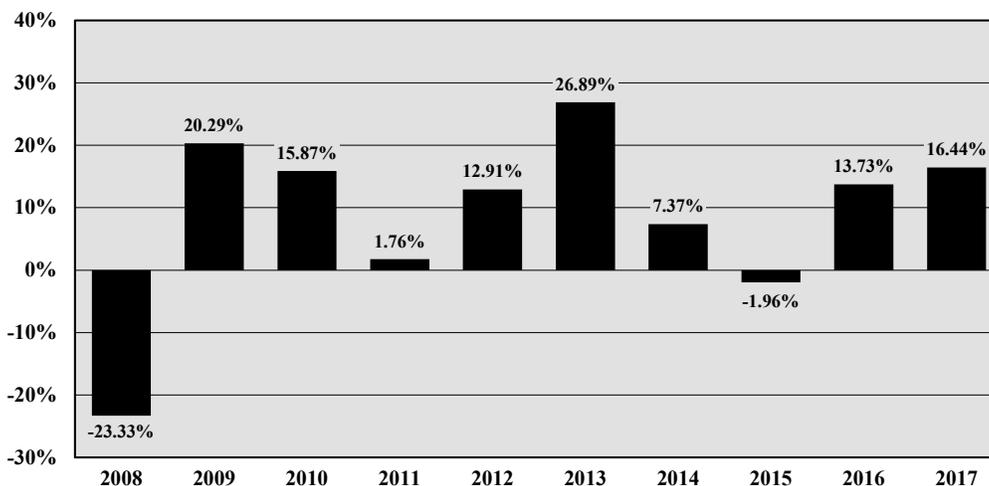

- **Investment Company Securities Risk.** When the Fund invests in other investment companies, such as other mutual funds, ETFs or closed-end funds, it indirectly bears its proportionate share of any fees and expenses payable directly by the other investment company. Therefore, the Fund will incur higher expenses, many of which may be duplicative. In addition, the Fund may be affected by losses of the underlying funds and the level of risk arising from the investment practices of the underlying funds (such as the use of derivatives by the underlying funds).
- **REIT Risk.** To the extent the Fund invests in REITs, it is subject to risks generally associated with investing in real estate, such as possible declines in the value of real estate, adverse general and local economic conditions, possible lack of availability of mortgage funds, changes in interest rates, and environmental problems.
- **Government Securities Risks.** It is possible that the U.S. Government would not provide financial support to its agencies or instrumentalities if it is not required to do so by law. The U.S. Government’s guarantee of ultimate payment of principal and timely payment of interest on certain U.S. Government securities owned by the Fund does not imply that the Fund’s shares are guaranteed or that the price of the Fund’s shares will not fluctuate.
- **Leveraged or Inverse ETF Risk.** The NAV and market price of these ETFs is generally more volatile than the value of the tracked index (or sector, currency or other benchmark), or of other ETFs that do not use leverage. This is because inverse and leveraged ETFs use investment techniques and financial instruments that may be considered aggressive, including the use of derivative transactions and short selling techniques. The use of these techniques may cause the inverse or leveraged ETFs to lose more money in market environments that are adverse to their investment objectives than other funds that do not use such techniques.

Performance

The information below shows some indication of the risk of investing in the Fund. The bar chart and performance table show the variability of the Fund’s returns, over time which is some indication of the risks of investing in the Fund. The Average Annual Total Returns table shows how the average annual returns of the Fund’s shares compare with those of a broad measure of market performance. The information shown assumes reinvestments of dividends and distributions. Remember that past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future.

The Fund was reorganized on March 8, 2013 from a series of the Unified Series Trust, an Ohio business trust (the “Predecessor Fund”), to a series of Northern Lights Fund Trust III, a Delaware statutory trust (the “Reorganization”). The Predecessor Fund commenced operations on December 18, 2002. Shareholders of the Predecessor Fund received shares of the Fund in the Reorganization. The Predecessor Fund is the successor to the Marathon Value Portfolio, a series of the AmeriPrime Funds (the “Original Fund”), which commenced operations on March 12, 1998. The Adviser began providing investment advisory services to the Predecessor Fund on March 28, 2000. The Fund is the continuation of the Predecessor Fund and has substantially the same investment objectives, strategies and investment policies as the Original Fund and the Predecessor Fund. Therefore, performance information includes performance of the Predecessor Fund.

Calendar Year Returns as of December 31

Best Quarter: 3rd Quarter, 2009 13.52%
Worst Quarter: 4th Quarter, 2008 (16.83)%

AVERAGE ANNUAL TOTAL RETURNS
(for the periods ended December 31, 2017)

Fund	1 Year	5 Years	10 Years
Return Before Taxes	16.44%	12.08%	8.06%
Return After Taxes on Distributions ⁽¹⁾⁽²⁾	14.77%	11.26%	7.45%
Return After Taxes on Distributions and Sale of Fund Shares ⁽¹⁾⁽³⁾	10.67%	9.53%	6.41%
S&P 500 Index ⁽⁴⁾ (reflects no deductions for fees, expenses, or taxes)	21.83%	15.79%	8.50%

- (1) After tax returns are calculated using the historical highest individual federal marginal income tax rates in effect and do not reflect the effect of state and local taxes. The after-tax returns shown are not relevant to those investors who hold their shares through tax-deferred arrangements such as 401(k) plans or IRAs.
- (2) “Return After Taxes on Distributions” shows the effect of taxable distributions (dividends and capital gains distributions), but assumes that Fund shares are still held at the end of the period.
- (3) “Return After Taxes on Distributions and Sale of Fund Shares” shows the effect of both taxable distributions and any taxable gain or loss that would be realized if Fund shares were sold at the end of the specified period. In certain cases, the figure representing “Return After Taxes on Distributions and Sale of Fund Shares” may be higher than the other return figures for the same period. A higher after tax return results when a capital loss occurs upon redemption and provides an assumed tax deduction that benefits the investor.
- (4) The S&P 500 Index measures the performance of 500 widely held, large-capitalization U.S. common stocks weighted by market value. The index does not reflect the deduction of fees, expenses or taxes that mutual fund investors bear.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates in effect and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts (“IRAs”). The index returns presented above assume reinvestment of all distributions and exclude the effect of taxes and fees (if expenses and taxes were deducted, the actual returns of the Index would be lower).

Investment Adviser

Gratus Capital, LLC serves as the investment adviser to the Fund.

Investment Adviser Portfolio Manager

Todd Jones has been Director of Investments and a portfolio manager of the Adviser since 2008.

He has served as the portfolio manager primarily responsible for the day-to-day management of the Fund since January 2018.

Purchase and Sale of Fund Shares

The investment minimums for the Fund are:

<u>Initial Investment</u>		<u>Subsequent Investment</u>	
Regular Account	Retirement Account	Regular Account	Retirement Account
\$2,500	\$2,500	\$100	\$100

The Fund reserves the right to waive any investment minimum. You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open. Redemption requests may be made in writing, by telephone, or through a financial intermediary and will be paid by ACH, check or wire transfer.

Tax Information

Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan. However, these dividend and capital gain distributions may be taxable upon their eventual withdrawal from tax-deferred plans.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

Investment Objective

The Fund's investment objective is to provide shareholders with long-term capital appreciation in a well-diversified portfolio. The Fund's investment objective may be changed by the Board of Trustees upon 60 days' written notice to shareholders.

Principal Investment Strategies

The Fund provides investors broad exposure to companies that the Adviser believes are the best opportunities or values in common stocks of U.S. companies. The Fund will invest in shares of companies that the Adviser believes will appreciate in value over time and that are either underpriced or reasonably priced in relation to their worth as a business.

The Fund invests primarily in common and preferred stocks (including common stock equivalents such as rights and warrants) of U.S. and foreign companies that have potential "value" in the Adviser's judgment. The Adviser believes that determining value involves an effort to understand a company's assets and business strengths and to compare those to the current price of the company's stock. It is worth noting that in today's economy, assets are often intangible. A value investor does not place great emphasis on precise projections of future earnings or on the current momentum of the company's business. The Fund may purchase stock of a company that is labeled a "growth" company, provided that the Adviser believes that the company's stock is selling at a reasonable price relative to its value. The Adviser intends for the Fund to provide investors with exposure to a wide number of industries.

In valuing a company, the Adviser takes a long-term approach, with an emphasis on management strength and the fundamental profitability of the company's business. To assess management strength, the Adviser looks for characteristics such as a long-term record of success or positive opinions from industry observers. The Adviser seeks companies whose businesses possess, in the Adviser's opinion, inherent strength based on factors such as superior production or distribution processes, unique products or quality franchises. The Fund may also purchase a company's stock if the Adviser's assessment of the private market value of the company (i.e., the price at which knowledgeable buyers and sellers would exchange a comparable business) exceeds, by a material amount, the price of the security. The Adviser's assessment of private market value is based on reported similar transactions, information in industry publications or from individuals within the industry, or other sources of information.

The Fund also may invest in longer term debt securities (maturities greater than 270 days), convertible debt securities, ETFs, REITs, options and convertible preferred stocks. The Fund may also invest in leveraged or inverse ETFs. The Fund may invest in lower-rated debt securities of a company if the Adviser believes that the company's junk bonds offer more potential for participating in the company's long-term prospects than could be achieved by investing in the company's other available securities. The Fund may invest up to 5% of its assets in junk bonds rated at the time of purchase BB/Ba or lower by S&P or Moody's or, unrated, but determined to be of comparable quality by the Adviser. The Fund may retain securities that are subsequently downgraded or in default, or the Adviser may sell them in an orderly manner. The Fund also may invest up to 25% of its assets, measured at the time of purchase, in equity or debt securities of any maturity of foreign issuers, directly or through ADRs. ADRs are certificates held in trust by a U.S. bank or trust company evidencing ownership of shares of foreign-based issuers, and are an alternative to purchasing foreign securities in their national markets and currencies.

The Fund intends to remain substantially invested in shares of common stock and preferred stock and other equity securities. If, however, the Adviser believes that sufficient investment opportunities that meet the Fund's investment criteria are not available the Fund may invest up to 20% of its total assets, measured at the time of purchase, in money market funds, investment grade money market instruments, fixed income securities (including investment-grade corporate bonds or notes, U.S. government or government agency securities and mortgage-backed securities), repurchase agreements, commercial paper, other short-term debt securities (maturities of 270 days or less) and cash equivalents. As a result of holding cash or cash equivalents, the Fund may be able to meet shareholder redemptions without selling stocks and realizing gains and losses. However, the Fund may not achieve its investment objective when holding a substantial cash position.

For clarity, the percentage limitations for investments in debt securities described above may overlap. For instance, if the Fund invested 17% of its assets in short-term debt securities of foreign issuers, it could invest another 8% of its assets in equity or debt securities of foreign issuers to stay within the 25% limitation on investments in equity or debt securities of foreign issuers. It could also invest another 3% of its assets in any of money market funds, investment grade money market instruments, fixed income securities, repurchase agreements, commercial paper, other short-term debt securities and cash equivalents to stay within the 20% limitation on investments in such securities.

The Adviser believes its price-driven, value-oriented approach will provide investors with the opportunity for growth, while providing some protection against permanent impairment of capital. The Adviser seeks to reduce risk by buying stocks the Adviser believes are reasonably priced relative to the company's earnings and sales, by diversifying broadly and by avoiding current market favorites. The Adviser's decision to purchase a stock is made without regard to the market capitalization of the company or its weighting in any market index. The Fund may invest in companies of any market capitalization, which includes large-cap, mid-cap, and small-cap securities.

The Fund may sell a security when the Adviser believes the price is no longer undervalued relative to the company's earnings and sales, the company's prospects have deteriorated, there has been a change in management, or better investment opportunities are available.

Principal Investment Risks:

- **Market Risk.** The prices of securities held by the Fund may decline in response to certain events taking place around the world, including those directly involving the companies whose securities are owned by the Fund; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations. Investors in the Fund should have a long-term perspective and be able to tolerate potentially sharp declines in value.
- **Value Risk.** A company may be undervalued due to market or economic conditions, temporary earnings declines, unfavorable developments affecting the company and other factors, or because it is associated with a market sector that generally is out of favor with investors. Undervalued stocks tend to be inexpensive relative to their earnings or assets compared to other types of stock. However, these stocks can continue to be inexpensive for long periods of time and may not realize their full economic value.
- **Growth Risk.** Growth-oriented securities purchased by the Fund may involve large price swings and potential for loss. Growth companies are companies that the Adviser believes will have revenue and earnings that grow faster than the economy as a whole, offering above-average prospects for capital appreciation and little or no emphasis on dividend income. If the Adviser's perceptions of a company's growth potential are wrong, the securities purchased may not perform as expected, reducing the Fund's return.
- **Management Risk.** The Adviser's judgments about the attractiveness, value, or potential appreciation of the Fund's investments may prove to be incorrect. If the Adviser's strategies fail to produce the intended results, the Fund could underperform other funds with similar objectives and investment strategies.
- **Small-Cap and Mid-Cap Risk.** Stocks of small-capitalization and mid-capitalization companies are more risky than stocks of larger companies. Many of these companies are young and have a limited track record. Their securities may trade less frequently and in more limited volume than those of more mature companies. As a result, small- and mid-cap stocks may be significantly more volatile than larger-cap stocks. Small-cap and mid-cap companies also may lack the managerial, financial or other resources necessary to implement their business plans or succeed in the face of competition. The prospects for a company or its industry may deteriorate because of a variety of factors, including disappointing operating results or changes in the competitive environment. It may be difficult to sell a small-cap or mid-cap stock, and this lack of market liquidity can adversely affect the Fund's ability to realize the market price of a stock, especially during periods of rapid market decline.
- **Foreign Securities Risk.**
 - **General Foreign Securities Risk.** When the Fund invests in foreign securities (whether directly or through ADRs), including investments in other investment companies that hold a portfolio of foreign securities, it will be subject to additional risks not typically associated with investing in U.S. Government securities and securities of domestic companies. There may be less publicly available information about a foreign issuer than a domestic one, and foreign companies are not generally subject to uniform accounting, auditing and financial standards and requirements comparable to those applicable to U.S. companies. In addition, the value of securities denominated in foreign currency can change when foreign currencies strengthen or weaken relative to the U.S. dollar. These currency movements may negatively impact the value of the Fund's portfolio even when there is no change in the value of the related security in the issuer's home country. ADRs do not eliminate all of the risks associated with direct investment in the securities of foreign issuers.
 - **Emerging Market Risk.** To the extent that the Fund invests in securities of foreign companies in emerging markets, the Fund will be subject to additional risks that may be different from or greater than risks of investing in securities of foreign companies based in developed countries. These risks include: illiquidity, significant price volatility; restrictions on foreign investment; possible repatriation of investment income and capital; currency declines and inflation (including rapid fluctuations in inflation rates).
 - **Currency Risk.** Foreign investments also may be riskier than U.S. investments because of fluctuations in currency exchange rates. Securities of foreign companies may be denominated in foreign currencies. Exchange rate fluctuations may reduce or eliminate gains or create losses. The Adviser may not hedge against currency movements in the various markets in which the Fund invests so the value of the Fund is subject to the risk of adverse changes in currency exchange rates.
- **Preferred Stock Risk.** Preferred stock may be subject to a number of risks, including that the issuer, under certain conditions, may skip or defer dividend payments for long periods of time. If the Fund owns a preferred security that is deferring its distributions, the Fund may be required to report income for tax purposes while it is not receiving any income. In addition, holders of preferred stock typically do not have any voting rights, except in cases when dividends are in arrears beyond stated time periods. As with common stock, preferred stock is subordinated to bonds and other debt instruments in any issuer's capital structure in terms of priority to corporate income and liquidation payments, and therefore is subject to greater credit risk than those debt instruments.

- **Fixed Income Risk.**

- **Credit Risk.** Changes in the financial strength of an issuer may affect the issuer's ability to repay principal and to make timely interest payments. The degree of risk for a particular security may be reflected in its credit rating. Junk bonds are subject to greater credit and market risk than higher rated securities.
- **Change in Rating Risk.** If a rating agency gives a debt security a lower rating, the value of the debt security will decline because investors will demand a higher rate of return.
- **Duration Risk.** Prices of debt securities with longer effective maturities are more sensitive to interest rate changes than those with shorter effective maturities.
- **Interest Rate Risk.** Changes in interest rates will affect the value of the Fund's investments in debt securities. Increases in interest rates may cause the value of the Fund's investments to decline and this decrease in value may not be offset by higher interest income from new investments. Interest rate risk is greater for investments in junk bonds. In addition, the issuers of certain types of securities, such as mortgage-backed securities, may prepay principal earlier than scheduled when interest rates rise, forcing the Fund to reinvest in lower yielding securities. Slower than expected principal payments may also extend the average life of such securities, locking in below-market interest rates and reducing their value. Typically, a rise in interest rates causes a decline in the value of fixed income securities. The value of fixed income securities typically falls when an issuer's credit quality declines and may even become worthless if an issuer defaults. Recently, interest rates have been historically low. Current conditions may result in a rise in interest rates, which in turn may result in a decline in the value of the bond investments held by the Fund. As a result, for the present, interest rate risk may be heightened.
- **Mortgage-Related and Other Asset-Backed Securities Risk.** Mortgage-related securities include pass-through securities, collateralized mortgage obligations ("CMOs"), commercial mortgage-backed securities ("MBS"), mortgage dollar rolls, CMO residuals, stripped mortgage-backed securities and other securities that directly or indirectly represent a participation in, or are secured by and payable from, mortgage loans on real property. The value of some mortgage- or asset-backed securities may be particularly sensitive to changes in prevailing interest rates. Early repayment of principal on some mortgage-related securities may expose the Fund to a lower rate of return upon reinvestment of principal. When interest rates rise, the value of a mortgage-related security generally will decline; however, when interest rates are declining, the value of mortgage-related securities with prepayment features may not increase as much as other fixed income securities. The value of these securities may fluctuate in response to the market's perception of the creditworthiness of the issuers. MBS may also possess credit risk. Because the assets providing cash flows to a mortgage-backed security are comprised of home mortgage loans, the holders of MBS are subject to default and delinquency risks. If mortgage borrowers are delinquent or default on their payments, the holders of MBS may not realize full repayment of their investment or may experience delays in the repayment of their investment. The credit risk of mortgage- backed securities depends, in part, on the likelihood of the borrower paying the promised cash flows of principal and interest on time. The credit risk of a specific MBS may be influenced by a variety of factors including: (i) the mortgage borrower's lessened ability to repay in light of changed circumstances such as a job loss; (ii) the borrower's ability to make higher mortgage payments which may result from floating- rate interest resets; (iii) declines in the value of the property which serves as collateral for the mortgage loan; and (iv) seniority or priority of the specific MBS relative to other claims on the cash flow from the pool of mortgage loans.

- **Junk Bond Risk.** To the extent the Fund invests in high yield securities (junk bonds), it will be subject to greater levels of interest rate and credit risks than funds that do not invest in such securities. These securities are considered predominately speculative with respect to the issuer's continuing ability to make principal and interest payments. An economic downturn could adversely affect the market for these securities and reduce the Fund's ability to sell these securities (liquidity risk). If the issuer of a security is in default with respect to interest or principal payments, the Fund may lose its entire investment.

- **Investment Company Securities Risk.** When the Fund invests in other investment companies, such as other mutual funds, ETFs or closed-end funds, it indirectly bears its proportionate share of any fees and expenses payable directly by the other investment company. Therefore, the Fund will incur higher expenses, many of which may be duplicative. In addition, the Fund may be affected by losses of the underlying funds and the level of risk arising from the investment practices of the underlying funds (such as the use of derivatives by the underlying funds). ETFs are also subject to the following risks: (i) an ETF's shares may trade at a market price that is above or below their NAV; (ii) the ETF may employ an investment strategy that utilizes high leverage ratios; or (iii) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are de-listed from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally. The Fund has no control over the risks taken by the underlying funds in which it invests.

- **REIT Risk.** To the extent the Fund invests in REITs, it is subject to risks generally associated with investing in real estate, such as (i) possible declines in the value of real estate, (ii) adverse general and local economic conditions, (iii) possible lack of availability of mortgage funds, (iv) changes in interest rates, and (v) environmental problems. In addition, REITs are subject to certain other risks related specifically to their structure and focus such as: dependency upon management skills; limited diversification; the risks of locating and managing financing for projects; heavy cash flow dependency; possible default by borrowers; the costs and potential losses of self-liquidation of one or more holdings; the possibility of failing to maintain exemptions from securities registration; and, in many cases, relatively small market capitalization, which may result in less market liquidity and greater price volatility.

- **Government Securities Risks.**

- **Agency Risk.** It is possible that the U.S. Government would not provide financial support to its agencies or instrumentalities if it is not required to do so by law. If a U.S. Government agency or instrumentality in which the Fund invests defaults and the U.S. Government does not stand behind the obligation, the Fund's share price or yield could fall. Securities of certain U.S. Government sponsored entities, such as Freddie Mac or Fannie Mae, are neither issued nor guaranteed by the U.S. Government.
- **No Guarantee.** The U.S. Government's guarantee of ultimate payment of principal and timely payment of interest on certain U.S. Government securities owned by the Fund does not imply that the Fund's shares are guaranteed or that the price of the Fund's shares will not fluctuate.

- **Leveraged or Inverse ETF Risk.** Unlike regular ETFs, the value of inverse ETFs decreases when the tracked index (or sector, currency or other benchmark) rises, and vice versa if the tracked index falls. Leveraged ETFs seek a multiple return of the tracked index. The NAV and market price of these ETFs is generally more volatile than the value of the tracked index, or of other ETFs that do not use leverage. This is because inverse and leveraged ETFs use investment techniques and financial instruments that may be considered aggressive, including the use of derivative transactions and short selling techniques. The use of these techniques may cause the inverse or leveraged ETFs to lose more money in market environments that are adverse to their investment objectives than other funds that do not use such techniques. Furthermore, there is no guarantee that each leveraged or inverse ETF in the Fund's portfolio will achieve its stated daily return, or that its long-term returns will be consistent with the daily return. The long-term returns of inverse ETFs may be substantially less than the daily return, particularly in volatile market conditions. Investments in leveraged or inverse ETFs may also cause the Fund to realize short-term capital gains that are taxed as ordinary income.

Temporary Investments

To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in high-quality short-term debt securities and money market instruments. These short-term debt securities and money market instruments include: shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. While the Fund is in a defensive position, the opportunity to achieve its investment objective will be limited. Furthermore, to the extent that the Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because shareholders will pay the fees and expenses of the fund and, indirectly, the fees and expenses of the underlying money market funds. The Fund may also invest a substantial portion of its assets in such instruments at any time to maintain liquidity or pending selection of investments in accordance with its policies.

Portfolio Holdings Disclosure

A description of the Fund's policies regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information.

Cybersecurity

The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its NAV; impediments to trading; the inability of the Fund, the Adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invest; counterparties with which the Fund engage in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT

Investment Adviser

Gratus Capital, LLC, 3350 Riverwood Parkway, Suite 1550, Atlanta, GA, 30339, www.gratuscapital.com, has served as investment adviser to the Fund since May 1, 2016. Gratus is a registered investment adviser that provides research, market analysis and financial planning services to its clients. Gratus has an investment committee consisting of seven members with over 100 years of combined experience. As of September 30, 2017, Gratus had approximately \$1.53 billion in assets under management.

The Adviser provides investment advisory services and pays most of the Fund's expenses (with certain exceptions noted below) in return for a "universal fee." For its services to the Fund, the Adviser is entitled to receive an annual fee equal to 1.10% of the Fund's average daily net assets. The Fund, not the Adviser, pays the following expenses: brokerage fees and commissions, indirect costs of investing in other investment companies, taxes, borrowing costs (such as (a) interest and (b) dividend expenses on securities sold short), extraordinary or nonrecurring expenses, such as litigation, and any 12b-1 fees.

During the fiscal year ended September 30, 2017, the Fund incurred advisory fees in total of 1.10% of its average net assets.

A discussion regarding the basis for the Board of Trustees' most recent renewal of the advisory agreement is included in the Fund's semi-annual report dated March 31, 2017.

Investment Adviser Portfolio Manager

Todd Jones has been primarily responsible for the day-to-day management of the Fund, since January 2018. Mr. Jones has been Director of Investments and a portfolio manager of the Adviser since 2008.

The Fund's Statement of Additional Information provides additional information about the Portfolio Manager's compensation structure, other accounts managed by the Portfolio Manager, and the Portfolio Manager's ownership of shares of the Fund.

HOW SHARES ARE PRICED

Shares of the Fund are sold at NAV. The NAV of the Fund is determined at close of regular trading (normally 4:00 p.m. Eastern Time) on each day the New York Stock Exchange (“NYSE”) is open for business. NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The NYSE is closed on weekends and New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a share class for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the NYSE on that day.

Generally, the Fund’s securities are valued each day at the last quoted sales price on each security’s primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid ask prices on such exchanges. Securities primarily traded in the National Association of Securities Dealers’ Automated Quotation System (“NASDAQ”) National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity.

If market quotations are not readily available, securities will be valued at their fair market value as determined using the “fair value” procedures approved by the Board of Trustees. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different from the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board of Trustees has delegated execution of these procedures to a fair value committee composed of one or more officers from each of the (i) Trust, (ii) administrator, and (iii) Adviser. The committee may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

The Fund may use independent pricing services to assist in calculating the value of the Fund’s securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. Because the Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of some of the Fund’s portfolio securities may change on days when you may not be able to buy or sell Fund shares.

In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the NYSE. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund’s portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund’s fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund’s portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund’s NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine NAV, or from the price that may be realized upon the actual sale of the security.

With respect to any portion of the Fund’s assets that are invested in one or more open-end management investment companies registered under the 1940 Act, the Fund’s NAV is calculated based upon the NAVs of those open-end management investment companies, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

HOW TO PURCHASE SHARES

Purchasing Shares

The shares are offered at the public offering price, which is NAV per share. You may purchase shares of the Fund by sending a completed application form to the following address:

Regular Mail
Marathon Value Portfolio
c/o Gemini Fund Services, LLC
PO Box 541150
Omaha, Nebraska 68154

Express/Overnight Mail
Marathon Value Portfolio
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, Nebraska 68130

The USA PATRIOT Act requires financial institutions, including the Fund, to adopt certain policies and programs to prevent money-laundering activities, including procedures to verify the identity of customers opening new accounts. As requested on the application, you should supply your full name, date of birth, social security number and permanent street address. Mailing addresses containing a P.O. Box will not be accepted. This information will assist the Fund in verifying your identity. Until such verification is made, the Fund may temporarily limit additional share purchases. In addition, the Fund may limit additional share purchases or close an account if it is unable to verify a shareholder's identity. As required by law, the Fund may employ various procedures, such as comparing the information to fraud databases or requesting additional information or documentation from you, to ensure that the information supplied by you is correct.

Automatic Investment Plan: You may participate in the Fund's Automatic Investment Plan, an investment plan that automatically moves money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$100 on specified days of each month into your established Fund account. Please contact the Fund at 1-800-788-6086 for more information about the Fund's Automatic Investment Plan.

Purchase through Brokers: You may invest in the Fund through brokers or agents who have entered into selling agreements with the Fund's distributor. The brokers and agents are authorized to receive purchase and redemption orders on behalf of the Fund. Such brokers are authorized to designate other intermediaries to receive purchase and redemption orders on the Fund's behalf. The Fund will be deemed to have received a purchase or redemption order when an authorized broker or, if applicable, a brokers authorized designee receives the order. The broker or agent may set their own initial and subsequent investment minimums. You may be charged a fee if you use a broker or agent to buy or redeem shares of the Fund. Finally, various servicing agents use procedures and impose restrictions that may be in addition to, or different from those applicable to investors purchasing shares directly from the Fund. You should carefully read the program materials provided to you by your servicing agent.

Purchase by Wire: If you wish to wire money to make an investment in the Fund, please call the Fund at 1-800-788-6086 for wiring instructions and to notify the Fund that a wire transfer is coming. Any commercial bank can transfer same-day funds via wire. The Fund will normally accept wired funds for investment on the day received if they are received by the Fund's designated bank before the close of regular trading on the NYSE. Your bank may charge you a fee for wiring same-day funds.

The Fund, however, reserves the right, in its sole discretion, to reject any application to purchase shares. Applications will not be accepted unless they are accompanied by a check drawn on a U.S. bank, thrift institutions, or credit union in U.S. funds for the full amount of the shares to be purchased. After you open an account, you may purchase additional shares by sending a check together with written instructions stating the name(s) on the account and the account number, to the above address. Make all checks payable to the Fund. The Fund will not accept payment in cash, credit cards or third party checks. Also, to prevent check fraud, the Fund will not accept third party checks, U.S. Treasury checks, credit card checks or starter checks for the purchase of shares.

Note: Gemini Fund Services, LLC, the Fund's transfer agent, will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by the Fund, for any check returned to the transfer agent for insufficient funds.

When Order is Processed

All shares will be purchased at the NAV per share next determined after the Fund receives your application or request in good order. All requests received in good order by the Fund before 4:00 p.m. (Eastern time) will be processed on that same day. Requests received after 4:00 p.m. will be processed on the next business day.

Good Order: When making a purchase request, make sure your request is in good order. "Good order" means your purchase request includes:

- the name of the Fund;
 - the dollar amount of shares to be purchased;
 - a completed purchase application or investment stub;
 - check payable to the "Marathon Value Portfolio."
-

Retirement Plans

You may purchase shares of the Fund for your individual retirement plans. Please call the Fund at 1-800-788-6086 for the most current listing and appropriate disclosure documentation on how to open a retirement account.

HOW TO REDEEM SHARES

Redeeming Shares

The Fund typically expects that it will take up to three business days following the receipt of your redemption request to pay out redemption proceeds by check or electronic transfer. The Fund typically expects to pay redemptions from cash, cash equivalents, proceeds from the sale of Fund shares, any lines of credit, and then from the sale of portfolio securities. These redemption payment methods will be used in regular and stressed market conditions. You may redeem all or any portion of the shares credited to your account by submitting a written request for redemption to:

Regular Mail
Marathon Value Portfolio
c/o Gemini Fund Services, LLC
PO Box 541150
Omaha, Nebraska 68154

Express/Overnight Mail
Marathon Value Portfolio
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, Nebraska 68130

Redemptions by Telephone: The telephone redemption privilege is automatically available to all new accounts except retirement accounts. If you do not want the telephone redemption privilege, you must indicate this in the appropriate area on your account application or you must write to the Fund and instruct it to remove this privilege from your account.

The proceeds will be sent by mail to the address designated on your account or wired directly to your existing account in a bank or brokerage firm in the United States as designated on your application. To redeem by telephone, call 1-800-788-6086. IRA accounts are not redeemable by telephone.

The Fund reserves the right to suspend the telephone redemption privileges with respect to your account if the name(s) or the address on the account has been changed within the previous 30 days. Neither the Fund, the transfer agent, nor their respective affiliates will be liable for complying with telephone instructions they reasonably believe to be genuine or for any loss, damage, cost or expenses in acting on such telephone instructions and you will be required to bear the risk of any such loss. The Fund or the transfer agent, or both, will employ reasonable procedures to determine that telephone instructions are genuine. If the Fund and/or the transfer agent do not employ these procedures, they may be liable to you for losses due to unauthorized or fraudulent instructions. These procedures may include, among others, requiring forms of personal identification prior to acting upon telephone instructions, providing written confirmation of the transactions and/or tape recording telephone instructions.

Redemptions through Broker: If shares of the Fund are held by a broker-dealer, financial institution or other servicing agent, you must contact that servicing agent to redeem shares of the Fund. The servicing agent may charge a fee for this service.

Redemptions by Wire: You may request that your redemption proceeds be wired directly to your bank account. The Fund's transfer agent imposes a \$15 fee for each wire redemption and deducts the fee directly from your account. Your bank may also impose a fee for the incoming wire.

Automatic Withdrawal Plan: If your individual accounts, IRA or other qualified plan account have a current account value of at least \$10,000, you may participate in the Fund's Automatic Withdrawal Plan, an investment plan that automatically moves money to your bank account from the Fund through the use of electronic funds transfers. You may elect to make subsequent withdrawals by transfers of a minimum of \$250 on specified days of each month into your established bank account. Please contact the Fund at 1-800-788-6086 for more information about the Fund's Automatic Withdrawal Plan.

Redemptions in Kind

The Fund reserves the right to honor requests for redemption or repurchase orders made by a shareholder during any 90-day period by making payment in whole or in part in portfolio securities ("redemption in kind") if the amount of such a request is large enough to affect operations (if the request is greater than the lesser of \$250,000 or 1% of the Fund's net assets at the beginning of the 90-day period). The securities will be chosen by the Fund and valued using the same procedures as used in calculating the Fund's NAV. A shareholder may incur transaction expenses in converting these securities to cash.

When Redemptions are Sent

Once the Fund receives your redemption request in “good order” as described below, it will issue a check based on the next determined NAV following your redemption request. If you purchase shares using a check and soon after request a redemption, your redemption proceeds will not be sent until the check used for your purchase has cleared your bank.

Good Order: Your redemption request will be processed if it is in “good order.”

To be in good order, the following conditions must be satisfied:

- The request should be in writing, unless redeeming by telephone, indicating the number of shares or dollar amount to be redeemed;
 - The request must identify your account number;
 - The request should be signed by you and any other person listed on the account, exactly as the shares are registered; and
 - If you request that the redemption proceeds be sent to a person, bank or an address other than that of record or paid to someone other than the record owner(s), or if the address was changed within the last 30 days, or if the proceeds of a requested redemption exceed \$50,000, the signature(s) on the request must be medallion signature guaranteed by an eligible signature guarantor.
-

When You Need Medallion Signature Guarantees

If you wish to change the bank or brokerage account that you have designated on your account, you may do so at any time by writing to the Fund with your signature guaranteed. A medallion signature guarantee assures that a signature is genuine and protects you from unauthorized account transfers. You will need your signature guaranteed if:

- you request a redemption to be made payable to a person not on record with the Fund;
- you request that a redemption be mailed to an address other than that on record with the Fund;
- the proceeds of a requested redemption exceed \$50,000;
- any redemption is transmitted by federal wire transfer to a bank other than the bank of record; or
- your address was changed within 30 days of your redemption request.

Signatures may be guaranteed by any eligible guarantor institution (including banks, brokers and dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations). Further documentation will be required to change the designated account if shares are held by a corporation, fiduciary or other organization. *A notary public cannot guarantee signatures.*

Retirement Plans

If you own an IRA or other retirement plan, you must indicate on your redemption request whether the Fund should withhold federal income tax. Unless you elect in your redemption request that you do not want to have federal tax withheld, the redemption will be subject to withholding. Please call the Fund at 1-800-788-6086 for the most current listing and appropriate disclosure documentation on how to open a retirement account.

Low Balances

If at any time your account balance falls below \$1,000, the Fund may notify you that, unless the account is brought up to at least \$1,000 within 30 days of the notice, your account could be closed. After the notice period, the Fund may redeem all of your shares and close your account by sending you a check to the address of record. Your account will not be closed if the account balance drops below required minimums due to a decline in NAV.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund discourages and does not accommodate market timing. Frequent trading into and out of the Fund can harm all Fund shareholders by disrupting the Fund's investment strategies, increasing Fund expenses, decreasing tax efficiency and diluting the value of shares held by long-term shareholders. The Fund is designed for long-term investors and is not intended for market timing or other disruptive trading activities. Accordingly, the Board of Trustees has approved policies that seek to curb these disruptive activities while recognizing that shareholders may have a legitimate need to adjust their Fund investments as their financial needs or circumstances change. The Fund currently uses several methods to reduce the risk of market timing. These methods include:

- Committing staff to review, on a continuing basis, recent trading activity in order to identify trading activity that may be contrary to the Fund's "Market Timing Trading Policy";
- Rejecting or limiting specific purchase requests; and
- Rejecting purchase requests from certain investors.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund's shareholders.

Based on the frequency of redemptions in your account, the Adviser or Transfer Agent may in its sole discretion determine that your trading activity is detrimental to the Fund as described in the Fund's Market Timing Trading Policy and elect to (i) reject or limit the amount, number, frequency or method for requesting future purchases into the Fund and/or (ii) reject or limit the amount, number, frequency or method for requesting future exchanges or redemptions out of the Fund.

The Fund reserves the right to reject or restrict purchase requests for any reason, particularly when the shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. Neither the Fund nor the Adviser will be liable for any losses resulting from rejected purchase orders. The Adviser may also bar an investor who has violated these policies (and the investor's financial advisor) from opening new accounts with the Fund.

Although the Fund attempts to limit disruptive trading activities, some investors use a variety of strategies to hide their identities and their trading practices. There can be no guarantee that the Fund will be able to identify or limit these activities. Omnibus account arrangements are common forms of holding shares of the Fund. While the Fund will encourage financial intermediaries to apply the Fund's Market Timing Trading Policy to their customers who invest indirectly in the Fund, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Market Timing Trading Policy with respect to customers of financial intermediaries. For example, should it occur, the Fund may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Fund's Market Timing Trading Policy to their customers through such methods as implementing short-term trading limitations or restrictions and monitoring trading activity for what might be market timing, the Fund may not be able to determine whether trading by customers of financial intermediaries is contrary to the Fund's Market Timing Trading Policy. Brokers maintaining omnibus accounts with the Fund have agreed to provide shareholder transaction information to the extent known to the broker to the Fund upon request. If the Fund or its Transfer Agent or shareholder Servicing Agent suspects there is market timing activity in the account, the Fund will seek full cooperation from the service provider maintaining the account to identify the underlying participant. At the request of the Adviser, the service providers may take immediate action to stop any further short-term trading by such participants.

TAX STATUS, DIVIDENDS AND DISTRIBUTIONS

Any sale or exchange of the Fund's shares may generate tax liability (unless you are a tax-exempt investor or your investment is in a qualified retirement account). When you redeem your shares, you may realize a taxable gain or loss. This is measured by the difference between the proceeds of the sale and the tax basis for the shares you sold. (To aid in computing your tax basis, you generally should retain your account statements for the period that you hold shares in the Fund.)

The Fund intends to distribute substantially all of its net investment income and net capital gains annually. Both distributions will be reinvested in shares of the Fund unless you elect to receive cash. Dividends from net investment income (including any excess of net short-term capital gain over net long-term capital loss) are taxable to investors as ordinary income, while distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are generally taxable as long-term capital gain, regardless of your holding period for the shares. Any dividends or capital gain distributions you receive from the Fund will normally be taxable to you when made, regardless of whether you reinvest dividends or capital gain distributions or receive them in cash. Certain dividends or distributions declared in October, November or December will be taxed to shareholders as if received in December if they are paid during the following January. Each year the Fund will inform you of the amount and type of your distributions. IRAs and other qualified retirement plans are exempt from federal income taxation until retirement proceeds are paid out to the participant.

Your redemptions, including exchanges, may result in a capital gain or loss for federal tax purposes. A capital gain or loss on your investment is the difference between the cost of your shares, including any sales charges, and the amount you receive when you sell them.

On the account application, you will be asked to certify that your social security number or taxpayer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding or you did not certify your taxpayer identification number, the IRS requires the Fund to withhold a percentage of any dividend, redemption or exchange proceeds. The Fund reserves the right to reject any application that does not include a certified social security or taxpayer identification number. If you do not have a social security number, you should indicate on the purchase form that your application to obtain a number is pending. The Fund is required to withhold taxes if a number is not delivered to the Fund within seven days.

This summary is not intended to be and should not be construed to be legal or tax advice. You should consult your own tax advisers to determine the tax consequences of owning the Fund's shares.

DISTRIBUTION OF SHARES

Distributor

Northern Lights Distributors, LLC, 17605 Wright Street, Omaha, NE 68130, is the distributor for the shares of the Fund. Northern Lights Distributors, LLC is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). Shares of the Fund are offered on a continuous basis.

Additional Compensation to Financial Intermediaries

The Fund’s distributor, its affiliates, and the Fund’s Adviser and its affiliates may, at their own expense and out of their own assets including their legitimate profits from Fund-related activities, provide cash payments to financial intermediaries who sell shares of the Fund. Financial intermediaries include brokers, financial planners, banks, insurance companies, retirement or 401(k) plan administrators and others. These payments may be in addition to any Rule 12b-1 fees or sales charges, to the extent applicable and disclosed elsewhere in this Prospectus. These payments are generally made to financial intermediaries that provide shareholder or administrative services, or marketing support. Marketing support may include access to sales meetings, sales representatives and financial intermediary management representatives, inclusion of the Fund on a sales list, including a preferred or select sales list, or other sales programs. These payments also may be made as an expense reimbursement in cases where the financial intermediary provides shareholder services to Fund shareholders. The distributor may, from time to time, provide promotional incentives to certain investment firms. Such incentives may, at the distributor’s discretion, be limited to investment firms who allow their individual selling representatives to participate in such additional compensation.

Householding

To reduce expenses, we mail only one copy of the Prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 1-800-788-6086 on days the Fund is open for business or contact your financial institution. We will begin sending you individual copies thirty days after receiving your request.

FINANCIAL HIGHLIGHTS

The Financial Highlights table is intended to help you understand the Fund's financial performance for the fiscal years and period presented. The Fund is a continuation of the Predecessor Fund and, therefore, the financial information includes results of the Predecessor Fund. Certain information reflects financial results for a single share of the Fund. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the Fund (assuming reinvestment of all dividends and distributions). The information has been audited by Cohen & Company, Ltd., the Fund's independent registered public accounting firm, whose report, along with the Fund's financial statements, are included in the Fund's September 30, 2017 annual report, which is available upon request.

Net asset value, end of period	<u>\$27.43</u>	<u>\$24.59</u>	<u>\$23.24</u>	<u>\$23.01</u>	<u>\$21.88</u>	<u>\$17.72</u>
Total return ^(a)	<u>13.56%</u>	<u>7.36%^(h)</u>	<u>3.46%</u>	<u>8.58%</u>	<u>25.48%</u>	<u>10.24%</u>
Net assets, end of period (000s)	<u>\$71,862</u>	<u>\$62,984</u>	<u>\$63,306</u>	<u>\$67,133</u>	<u>\$64,045</u>	<u>\$50,357</u>
Ratio of expenses to average net assets ^(c)	1.10%	1.10% ^(g)	1.10%	1.13% ^(e)	1.21% ^(d)	1.25%
Ratio of net investment income to average net assets	0.64%	0.79% ^(g)	0.65%	0.56%	0.61%	0.75%
Portfolio Turnover Rate	15%	6% ^(h)	12%	16%	10%	13%

(a) Total return in the above table represents the rate that the investor would have earned or lost on an investment in the Fund, assuming reinvestment of dividends.

(b) Per share amounts calculated using the average shares method, which more appropriately presents the per share data for the period.

(c) Recognition of net investment income by the Fund is affected by the timing of the declaration of dividends by the underlying investment companies in which the Fund invests. The expenses of the investment funds are excluded from the Fund's expense ratio.

(d) Effective March 8, 2013, the universal fee changed from 1.25% to 1.20%.

(e) Effective March 1, 2014, the universal fee changed from 1.20% to 1.10%.

(f) Represents the period November 1, 2015 through September 30, 2016. See Note 1.

(g) Annualized.

(h) Not annualized.

PRIVACY POLICY

Rev. February 2014

FACTS	WHAT DOES NORTHERN LIGHTS FUND TRUST III DO WITH YOUR PERSONAL INFORMATION?
--------------	--

Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Who we are

Who is providing this notice? Northern Lights Fund Trust III

What we do

How does Northern Lights Fund Trust III protect my personal information? To protect your personal information from unauthorized access and use, we use security measures that comply with federal law. These measures include computer safeguards and secured files and buildings.

Our service providers are held accountable for adhering to strict policies and procedures to prevent any misuse of your nonpublic personal information.

How does Northern Lights Fund Trust III collect my personal information? We collect your personal information, for example, when you

- Open an account
- Provide account information
- Give us your contact information
- Make deposits or withdrawals from your account
- Make a wire transfer
- Tell us where to send the money
- Tells us who receives the money
- Show your government-issued ID
- Show your driver's license

We also collect your personal information from other companies.

Why can't I limit all sharing? Federal law gives you the right to limit only

- Sharing for affiliates' everyday business purposes – information about your creditworthiness
- Affiliates from using your information to market to you
- Sharing for nonaffiliates to market to you

State laws and individual companies may give you additional rights to limit sharing.
